MANAGEMENT REPORT OF FUND PERFORMANCE

NCM CONSERVATIVE INCOME PORTFOLIO

MANAGEMENT REPORT OF FUND PERFORMANCE NCM CONSERVATIVE INCOME PORTFOLIO

This annual management report of fund performance contains financial highlights but does not contain the annual financial statements of the investment fund. You can get a copy of the Fund's financial statements at your request, and at no cost, by calling toll free (877) 531-9355, by writing us at 1850, 333-7th Avenue SW Calgary, Alberta T2P 2Z1 or by visiting our website at www.ncminvestments.com or SEDAR at www.sedar.com.

Security holders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of NCM Conservative Income Portfolio (the "Fund") is designed to provide investors with current income and the potential for capital preservation by investing, directly or indirectly through investments in underlying funds, in a diversified portfolio consisting primarily of fixed-income securities and to a lesser extent equity securities from anywhere in the world.

The Fund achieves this objective by aiming to maintain a diversified portfolio of securities, either directly or indirectly through investments in underlying funds, including underlying funds managed or advised by the Manager or its affiliates. The equity component of the Fund will generally range between 25% – 40%, while the fixed income component will generally range between 60% – 75%, based upon the portfolio manager's assessment of market conditions.

It is expected that the Fund will invest primarily in underlying funds managed or advised by the Manager or its affiliates and exchange traded funds ("ETF's").

The Fund may invest up to all of its assets in securities of mutual funds, exchange traded funds, and/or direct securities as it seeks to diversify its exposures across geography, sectors, capitalization, credit quality, and duration. As such, the Fund may invest up to all of its assets in foreign securities.

When selecting an underlying security for the Fund, the portfolio manager will aim to ensure that such investment is consistent with the Fund's investment objectives and will consider the market exposure of the security, the long term performance track record from a risk and reward perspective, and the associated fees, if any.

The Fund may invest in private placements or other illiquid equity or debt securities of public or private companies as permitted by securities regulations.

The Fund may engage in a limited amount of short selling as well as in securities lending, repurchase, and reverse repurchase transactions. The Fund may also invest in derivatives (including forward contracts, calls and puts) and in Horizon Beta Pro Exchange Traded Funds. These transactions will be used with the Fund's other investment strategies in a manner considered most appropriate to achieving the Fund's overall investment objectives and enhancing the Fund's returns.

The Fund may depart from its investment objectives and/or investment strategies by temporarily investing all or a portion of its assets in cash or fixed income securities issued or guaranteed by a Canadian or U.S. government, government agency, or company to try to protect it during a market downturn or for other reasons.

RISK

The risk level of the Fund is low.

The Fund is suitable for investors with a low to medium risk tolerance seeking current income along with potential for capital gains. General risks of an investment in the NCM Conservative Income Portfolio are detailed in the simplified prospectus and include equity risk, small and mid-capitalization company risk, series risk, liquidity risk, interest rate risk, and currency risk, among others.

The majority of the exposure in the Fund is to fixed income investments held in underlying Funds or ETF's. Higher

RISK (continued)

yielding investments, in bonds makes the Fund sensitive to changes in interest rates.

RESULTS OF OPERATIONS

As of September 30, 2020, the 12 month return for the NCM Conservative Portfolio was 2.5%. This performance compares to the Fund's benchmark, which had a return of 6.6% over the same period. The Fund's benchmark is 62.5% FTSE TMX Canada Universe Bond Index, 20.0% MSCI World Net Total Return Index (currency hedged), 12.5% S&P/TSX Composite Total Return Index, and 5.0% S&P 3-Month Canada Treasury Bill Total Return Index.

The Fund underperformed its bench primarily due to an elevated exposure to credit oriented fixed income. This segment of the fixed income market was significantly impacted by the COVID-19 related downturn in all investment markets. While credit oriented fixed income is recovering along with other markets, it is recovering at a slower pace. The Fund still holds a measurable amount of its fixed income exposure in credit oriented fixed income and the manager believes these holding will continue to recover to previous levels. The timing of the recovery at this point is an unknown but it is expected to result in favorable comparisons to the Fund's benchmark in the future.

The short term outlook for the global economy has deteriorated significantly recently due in large part to the COVID-19 virus outbreak. However, global stock markets have seen significant recoveries since the lows experienced in March. Investors appear to have been focusing more and more on the recovery prospects for the global economy and for global stock markets, rather than on the short term threats to global growth. As equity markets have been recovering the Fund has made adjustments to become more defensive in both its fixed income and its equity positions.

We believe longer term equity markets will stabilize and move higher. However, we do have near term concerns about heightened volatility and the potential for near term impairment of market value. Globally we are experiencing a new trend to higher COVID-19 infection rates. Markets are also being negatively impacted by political unknowns in the USA. Adding to this is the fact that globally, questions have been raised concerning governments' ability to continue to

inject capital to support the economy and capital markets. Given these concerns the manager of the Fund has adjusted equity levels lower and increased the diversification in the equity portion of the Fund. Within the fixed income portion of the Fund the manager has traded certain higher yield and higher risk fixed income ETFs in favor of lower risk ETFs that hold government bonds. The risks that the Fund has repositioned for are relatively short term in nature. It is the manager's intention to continue to monitor the markets as the various unknown become resolved and make opportunistic adjustments as conditions permit.

Since the spring the Fund has been actively making adjustments to reduce equity and balance out the remaining exposure. The Fund has seen an overall reduction in its USA fund and the Global fund investments. The Fund has also meaningfully increased its holdings in Non-North American equity and modestly increased its Canadian small company holdings. The theme oriented investments in specialized ETFs has remained steady in its overall theme exposure but was rebalanced to include a new theme, namely Global Agriculture. As mentioned above, the aggregate impact of these adjustments has resulted in a lower equity weight yet a higher level of diversification in the equity asset class.

Within fixed income, the Fund has historically held a higher exposure to corporate high yield and investment grade bonds compared with the benchmark. This positioning in corporate bonds has changed significantly as the fund took advantage in both high yield recoveries and investment grade recoveries selling much of these positions in favor of ETFs holding government bonds. During the year, the Manager repositioned most of its high yield holding and into ETFs holding investment grade corporate bonds. The unprecedented move by the U.S. Federal Reserve to support the U.S. investment grade corporate bond market and the quality parts of the high yield market have already resulted in a narrowing of credit spreads. These positions responded well and staged meaningful recovery after their purchase. Our corporate bond exposure has now been meaningfully reduced in favor of ETFs holding government fixed income. The maturity levels for the fixed income have remained relatively constant with a balance across long, mid and shorter term bond exposures.

Due to the selloff in risk assets seen in March as a result of the COVID-19 virus outbreak, the Fund's fixed income portfolio underperformed its fixed income benchmark for the year. However, going forward we feel that the fixed income

RESULTS OF OPERATIONS (continued)

portion of the Fund is well positioned to outperform its fixed income benchmark. While the Fund has significantly reduced its corporate bond exposure a portion of these exposures remain. As the economy recovers, we expect spreads to continue to narrow, particularly in high yield bonds, we believe this will help enhance returns relative to the benchmark. Lastly, the short duration of most of our positions should help limit volatility as the underlying bonds pull toward par as they approach maturity. This Fund currently holds approximately 60% of its asset in ETFs invested in government bonds and cash. The high yield holdings which amount to 9% of the Fund is split between BMO's High Yield US Corporate Bond ETF and NCM's Short Term Income Fund.

The net assets have been essentially unchanged, decreasing fractionally from \$14,398,654 to \$14,392,890, \$239,317 of this change is attributable to positive investment performance and \$245,081 was due to negative net contributions to the Fund.

RECENT DEVELOPMENTS

Effective May 20, 2020, investors residing in each of Northwest Territories, Nunavut and Yukon can purchase units in the Fund, in addition, the Trustee changed from Computershare Trust Company of Canada to NCM Asset Management Ltd.

In January 2020, the World Health Organization declared the coronavirus a global health emergency and on March 11, 2020, it was declared a global pandemic. The situation is dynamic with various cities and countries around the world responding in different ways to address the outbreak. At this time, governments and businesses around the world are introducing significant new measures to contain and control the spread of the virus.

There had been a significant drop in commodity prices and equity markets have reacted with the biggest decline experienced in more than a decade. In response, both the US Federal Reserve and the Bank of Canada quickly reduced their key interest rates.

The full impact of these circumstances on businesses will not be fully understood until time has passed. While the full impact is not yet known, we will continue to monitor the impact the coronavirus has on the Funds' investments and reflect the consequences as appropriate in our accounting and reporting.

RELATED PARTY TRANSACTIONS

Management fees of \$160,139 were paid to NCM Asset Management Ltd. ("NCM"), the Fund's Manager and Portfolio Manager. Management fees are 1.75% for Series A and Series T6 and 0.75% for Series F and Series F6, of the series net asset value of the Fund and are calculated and paid monthly.

NCM has agreed to absorb certain expenses associated with the Fund recorded in the financial statements, at September 30, 2020, in the amount of \$100,740.

FINANCIAL HIGHLIGHTS

The following tables show selected key financial information about the Fund's units and are intended to help you understand the Fund's financial performance for the fiscal years indicated. This information is derived from the Fund's audited annual financial statements.

Net asset value (NAV) per unit ⁽¹⁾

Series A	2020	2019 ⁽⁴⁾

(1) This information is provided as at September 30, 2020 and 2019 in accordance with International Financial Reporting Standards.

(2) Distributions, if any, are reinvested in additional units or paid in cash when requested.

(3) Net asset value and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the financial year. Due to the different methods of calculating individual components of the table, the sum of the individual components will not necessarily equal the ending net asset value.

(4) Series A commenced operations October 1, 2018.

(5) Series F commenced operations October 1, 2018

(6) Series I commenced operations November 1, 2018

(7) Series T6 commenced operations November 6, 2018

(8) Series F6 commenced operations December 10, 2018

(9) Series M commenced operations September 16, 2019

Net asset value per unit	27.58	27.37

(1) This information is provided as at September 30, 2020 and, 2019 in accordance with International Financial Reporting Standards.

(2) Management expense ratio (MER) is based on total expenses for the stated year and is expressed as an annualized percentage of daily average net asset value of the year.

(3) The Fund's portfolio turnover rate indicates how actively the Fund's Portfolio Manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of a year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and performance of the Fund.

(4) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the year.

(5) Series A commenced operations October 1, 2018.

(6) Series F commenced operations October 1, 2018

(7) Series I commenced operations November 1, 2018

(8) Series T6 commenced operations November 6, 2018

(9) Series F6 commenced operations December 10, 2018

(10) Series M commenced operations September 16, 2019

MANAGEMENT FEES

The Fund pays an annual management fee of 1.75% for Series A and Series T6 units, and 0.75% for Series F and Series F6 units, multiplied by the series net asset value of the Fund, to NCM, the Fund's Manager and Portfolio Manager. Management fees are calculated and paid monthly. No management fee is charged to the Fund in respect of Series I units; rather, the investors who hold Series I units will pay management fees directly to the Manager in an amount determined by negotiation with the Manager. There is no management fee attached to Series M. For the year ended September 30, 2020, management fees amounted to \$160,139. NCM paid servicing commissions of \$55,228 (i.e. 34.49%) from these management fees to investment dealers.

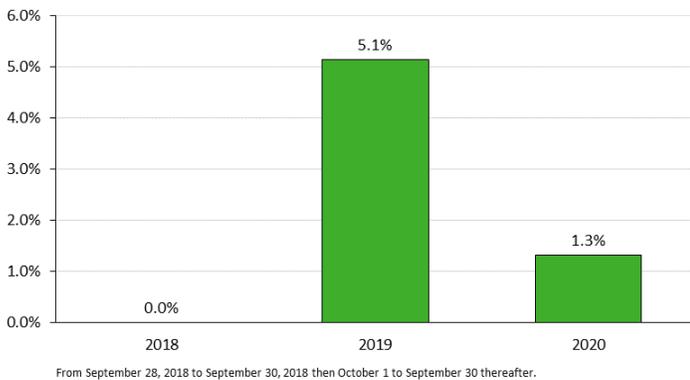

PAST PERFORMANCE

The charts below illustrate the performance of each Series of the Fund in percentages. These charts reflect the performance you would have received if you invested in the Fund on the first day of the year through the last day of the year.

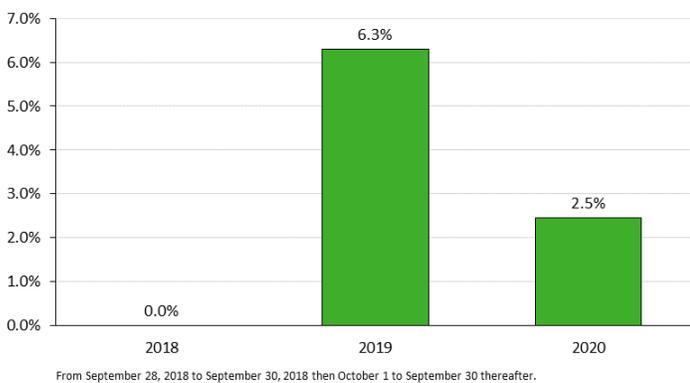

They assume that all distributions made by the Fund in the years shown are reinvested in additional securities of the Fund. They do not take into account sales, redemption, distribution or other optional charges which would have reduced returns or performance. Each year, the Fund's performance has changed and past performance does not guarantee future performance.
