RESULTS OF OPERATIONS

As of March 31, 2021, the 6 month return for the NCM Balanced Income Portfolio was 7.2%. This performance compares to the Fund's benchmark, which also had a return of 7.2% over the same period. The Fund's benchmark is 5% S&P 3-Month Canada Treasury Bill Index, 45% FTSE Canada Universe Bond Index, 15% S&P/TSX Composite Total Return Index, 24.5% Morningstar Developed Markets Target Market Exposure NR USD, 10.5% Morningstar Developed Markets Target Market Exposure NR EUR.

The Fund matched its benchmark over this period. The performance was a combination of strong equity recovery over the past 6 months and mixed fixed income results over the same period. It was held back to some extent, by its defensive positioning in lower yielding short term government fixed income during the last quarter of 2020. This positioning remains and is beginning to provide superior relative performance as the first quarter of 2021 has seen a general rise in interest rates. Higher rates negatively impact longer dated fixed income investments and this Fund's positioning in short term governments has protected against this event. The Fund's fixed income remains defensive and is primarily invested in short dated fixed income as the general rising rate environment is expected to continue. The Fund's defensive positioning in short government fixed

income has now been adjusted to hold modestly higher allocations to higher yielding short term corporate bonds. While higher interest rates remain a concern for the manager, improvement in broad macroeconomic conditions should lead to higher stability in corporate bond issues.

The equity positions in the Fund remain tilted toward Canada and Non-North American indices. Allocations to both Canada and Non-North American were modestly increased through the first quarter of 2021. The manager believes that the targeted regions for higher allocations represent higher relative value. While the environment for stocks in general remains very constructive, valuations in the USA markets are, in the manager's opinion, stretched. This means the manager thinks there is higher investment value risk in the USA indices.

The net assets have decreased by 16% with net assets decreasing from \$9,340,617 to \$7,856,624, \$562,117 of this change is attributable to positive investment performance and \$2,046,110 was due to negative net contributions to the Fund.

RELATED PARTY TRANSACTIONS

Management fees of \$57,375 were paid to NCM Asset Management Ltd. ("NCM"), the Fund's Manager and Portfolio Manager. Management fees are 1.80% for Series A and Series T6 and 0.80% for Series F and Series F6, of the series net asset value of the Fund and are calculated and paid monthly. Series M units are not available for general public purchase. The Manager and its affiliates offer wealth management services including fee-based and managed accounts under the Cumberland Private Wealth brand, and the Series M units are intended for such accounts. There is no management fee attached to Series M.

NCM has agreed to absorb certain expenses associated with the Fund recorded in the financial statements, at March 31, 2021, in the amount of \$47,096.

- (1) This information is provided as at March 31, 2021 and September 30, 2020, 2019 in accordance with International Financial Reporting Standards.
- (2) Management expense ratio (MER) is based on the Funds total expenses for the stated period including the Funds proportionate share of the expenses of the underlying funds, and is expressed as an annualized percentage of daily average net asset value of the period. As such, the MERs presented for the Funds is all-inclusive and includes the portion of MERs of the other funds attributable to the investment.
- (3) The Fund's portfolio turnover rate indicates how actively the Fund's Portfolio Manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling of the securities in its portfolio once in the course of a period. The higher the Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and performance of the Fund.
- (4) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period.
- (5) Series A commenced operations October 1, 2018.
- (6) Series F commenced operations October 1, 2018.
- (7) Series T6 commenced operations March 29, 2019.
- (8) Series F6 commenced operations October 1, 2018.
- (9) Series M commenced operations September 16, 2019.

MANAGEMENT FEES

The Fund pays an annual management fee of 1.80% for Series A and Series T6 units, and 0.80% for Series F and Series F6 units, multiplied by the series net asset value of the Fund, to NCM, the Fund's Manager and Portfolio Manager. Management fees are calculated and paid monthly. There is no management fee attached to Series M. For the six months ended March 31, 2021, management fees amounted to \$57,375. NCM paid servicing commissions of \$23,781 (i.e. 41.45%) from these management fees to investment dealers.

PAST PERFORMANCE

The charts below illustrate the performance of the Fund since inception in percentages. These charts reflect the performance you would have received if you invested in the Fund on the first day of the year through the last day of the year.

They assume that all distributions made by the Fund in the years shown are reinvested in additional securities of the Fund. They do not take into account sales, redemption, distribution or other optional charges which would have reduced returns or performance. Each year, the Fund's performance has changed and past performance does not guarantee future performance.
