GROWTH CLASS**

MANAGEMENT REPORT OF FUND PERFORMANCE NCM GLOBAL INCOME GROWTH CLASS

This interim management report of fund performance contains financial highlights but does not contain the interim financial statements of the investment fund. You can get a copy of the Fund's financial statements at your request, and at no cost, by calling toll free (877) 531-9355, by writing us at 1850, 333-7th Avenue SW Calgary, Alberta T2P 2Z1 or by visiting our website at www.ncminvestments.com or SEDAR at www.sedar.com.

Security holders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

RESULTS OF OPERATIONS

As of March 31, 2021, the six month return of the Fund was 9.5%, slightly underperforming the Fund's blended benchmark (52.5% Morningstar Developed Markets Target Market Exposure NR USD, 22.5% Morningstar Developed Markets Target Market Exposure NR EUR, and 25% FTSE Canada Universe Bond Index) return of 13.3% over the same period.

Most of the Fund's equity securities are denominated in foreign currency (89%). With the majority in the U.S. at 66%, followed by Western Europe at 17%, and Japan, Hong Kong, and Indonesia all being around 2% each. Due to this, the Manager employs a dynamic currency hedging strategy to try to lower volatility and augment returns over time but only focuses on those currencies that in aggregate are greater than 10% of the Funds net asset value. This threshold has been implemented due to the fact that multiple unhedged foreign currencies in a global equity strategy provides significant diversification benefits. We expect both monetary and fiscal policy settings to remain accommodative in the U.S., volatility to remain low and the global economy to continue recovering from the pandemic losses in the coming months which will be a positive macro backdrop for investors and encourage gains in equities, commodities, high beta FX,

and commodity currencies and typically, decent global investment conditions, low yields and low volatility favour a softening outlook on the U.S. dollar into riskier currencies and assets.

Through just over a quarter of the year, global equities are up about 10% and facing its first external overbought condition. The way the Manager likes to view the expected impact of an overbought condition is by looking at the strength of the trend internally and externally. When breadth is robust, and the absolute trend is strong (like it has been recently), overbought conditions tend to be followed by price consolidation through time rather than a serious correction. Historically, when the percentage of issues above their 65 displaced moving average are this high, forward returns are strong.

Additionally, there are three "macro" data points that the Manger is paying attention to;

- As result of the stimulus checks in the U.S., big brands throughout the world are openly contemplating 'activating' additional budgets for social media marketing channels meaning the Facebook's, Apple's and Google's are going to be the beneficiaries of big increases in ad-spending.
- A considerable gulf has opened up between the Federal Reserve's stated monetary policy path and the market's expectations. Ed Yardeni recently conducted a LinkedIn poll of interest rate expectations. While the poll is unscientific in its methodology, the results roughly parallel market expectations that the Federal Reserve would begin to raise rates in late 2022, and raise them several times in 2023. By contrast, the Federal Reserve's own Summary of Economic Projections doesn't see any rate hike until after 2022. Meaning that the Federal Reserve plans on staying hyper-accommodative far longer than the what the market expects which always good for equities.
- Further, Consumer Discretionary and Industrials are the Sectors trading the best with the more traditional defensives Sectors of Health Care and Consumer Staples trading the weakest on a relative basis. Those trends need to change before there can be serious chatter about the end of the Bull market. However, there can be little doubt we are likely in the mid to late innings so with multiyear highs in bullish sentiment, an apparent overbought condition, and approaching seasonal weakness (sell in May and go away) there are enough "red flags" about to suggest the market is

RESULTS OF OPERATIONS (continued)

tactically overheating, but not enough to try to pick a top in a market that continues to show momentum.

The fixed income weighting in the portfolio, which is comprised of corporate bonds and high yield securities, was 12% of the portfolio as of March 31, 2021. The fixed income portion of the portfolio outperformed the fixed income index over the period, owing to the portfolio holdings being more credit oriented and less interest rate sensitive than the benchmark. While still constructive on the medium to long term outlook for corporate bonds and high yield bonds, we note spreads are compressed and that we think ongoing interest rate volatility may result in range-bound but active markets for these securities in the shorter term. Consequently, despite the expected near term equity market volatility due to the uncertainty of the 2nd/3rd waves of COVID-19 and its variants, the Manager continues to believe that better medium term risk/reward opportunities exist in equities versus fixed income.

Within the equity portion of the portfolio, U.S. equities represent the largest geographic allocation at 66% as of March 31, 2021. The U.S. has seen a significant and massive recovery in its economy since the first COVID-19 virus outbreaks and lock downs from over a year ago. The incredible progress, in short order, the country has made on vaccinations means in all likelihood “normalcy” will be achieved in this economy well before any other. Over the medium term, the Manager feels that U.S. economy will continue to set the pace for the global economy and deserves its place as the lead horse in the stable. Further, regardless of the global economic outlook the U.S. equity markets continue to be one of the best performing equity markets in both good times and bad. Among the top performing U.S. stocks for the Fund during the period were Williams-Sonoma, First Republic Bank, Roku Inc and Alphabet Inc. Among the laggards over the period were Newmont Corp, and Ecolabs.

European equities represent 17% of the equity portfolio as of March 31, 2021. While this region continues to struggle to grow, and it now has to deal with the negative impacts of a disjointed vaccine rollout, valuation levels are now attractive and the Financials Sector represents a significant portion of

the European equity block. As the global economy recovers Financials do well so this will be a source of opportunity for the Fund. The Fund has a high quality European equity portfolio that the Manager remains very comfortable with on a longer term basis. Among the top performers in Europe over the period were RILBA Bank, Teleperformance, and DSV Panalpina all cyclically oriented stocks while the defensive names Unilever and Novartis were the weaker performers over the same period.

Asia Pacific and Emerging Market (“EM”) equities represent 6% of the equity portfolio (4% and 2% respectively) as of March 31, 2021. In Japan market action has favored Materials, Technology and Industrials which all speak to a pro-cyclicality lean and the worst ranked sectors are Health Care followed by Utilities and Consumer Staples. EM assets have been muddling underperforming the S&P 500 (+9%) and EM currencies have depreciated roughly 3%, an exact inverse of the U.S. Dollar Index (+3%). The Managers forward macro assumptions of higher commodity prices, interest rates, and Developed Market equities suggest EM ex-Asia equities are likely to lead turnaround and specifically, it is expected the most consequential markets to EM in Russia, South Africa, and Mexico against underweight positions in Taiwan and Chile, where valuations and geopolitical issues are headwinds.

The net assets have decreased by 3% with net assets decreasing from \$137,430,996 to \$133,645,791, \$11,938,781 of this change is attributable to positive investment performance and \$15,723,986 was due to negative net contributions to the Fund.

RELATED PARTY TRANSACTIONS

Management fees of \$1,036,030 were paid to NCM Asset Management Ltd. (“NCM”), the Fund’s Manager and Portfolio Manager. Management fees are 2% for Series A and Series T6 and 1% for Series F and Series F6, of the series net asset value of the Fund and are calculated and paid monthly. In addition, administrative fees of \$115,070 were paid to NCM. Administration fees are charged by NCM at or below cost. They relate to accounting, trading, record keeping, compliance and other administrative costs.

FINANCIAL HIGHLIGHTS

The following tables show selected key financial information about the Fund's shares and are intended to help you understand the Fund's financial performance for the fiscal periods indicated. This information is derived from the Fund's audited annual financial statements and unaudited interim financial statements.

(1) This information is provided as at March 31, 2021, September 30 for 2020, 2019 and 2018 and October 31 for the balance preceding periods presented. The information is in accordance with International Financial Reporting Standards.

(2) Distributions, if any, are reinvested in additional shares or paid in cash when requested.

(3) Net asset value and distributions are based on the actual number of shares outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of shares outstanding over the financial period. Due to the different methods of calculating individual components of the table, the sum of the individual components will not necessarily equal the ending net asset value.

(4) Series T6 commenced operations on Dec 12, 2017.

(5) Series F6 commenced operations on Dec 11, 2017.

(1) This information is provided as at March 31, 2021, September 30 for 2020, 2019 and 2018 and October 31 for the balance preceding periods presented. The information is in accordance with International Financial Reporting Standards.

(2) Management expense ratio (MER) is based on total expenses for the stated period and is expressed as an annualized percentage of daily average net asset value of the period.

(3) The Fund's portfolio turnover rate indicates how actively the Fund's Portfolio Manager manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of a period. The higher the Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and performance of the Fund.

(4) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period.

(5) Series T6 commenced operations on Dec 12, 2017.

(6) Series F6 commenced operations on Dec 11, 2017.

MANAGEMENT FEES

The Fund pays an annual management fee of 2% for Series A and Series T6, and 1% for Series F and Series F6, multiplied by the series net asset value of the Fund, to NCM, the Fund's Manager and Portfolio Manager. The management fee is calculated and paid monthly. No management fee is charged to Series I; instead, the investors pay a management fee directly to the Manager, in an amount determined through negotiation with the Manager. For the six months ended March 31, 2021, management fees amounted to \$1,036,030. NCM paid servicing commissions of \$381,873 (i.e. 36.86%) from these management fees to investment dealers. NCM also received fees for portfolio management and administrative services with respect to this Fund, as well as, all the other funds in the NCM group.

PAST PERFORMANCE

The charts below illustrate the performance of the Fund since inception on May 31, 2011 to March 31, 2021 in percentages. The Series I inception was March 29, 2012, the Series T6 inception was December 12, 2017 and the Series F6 inception was December 11, 2017. These charts reflect the performance you would have received if you invested in the Fund on the first day of the year through the last day of the year.

They assume that all distributions made by the Fund in the periods shown are reinvested in additional securities of the Fund. They do not take into account sales, redemption, distribution or other optional charges which would have reduced returns or performance. Each year, the Fund's performance has changed and past performance does not guarantee future performance.

YEAR BY YEAR RETURNS

Series A

Series F

Series I

YEAR BY YEAR RETURNS (continued)

Series T6

From December 12, 2017 to September 30, 2018 then October 1 to September 30 until 2021 which is from October 1, 2020 to March 31, 2021.

Series F6

From December 11, 2017 to September 30, 2018 then October 1 to September 30 until 2021 which is from October 1, 2020 to March 31, 2021.

ANNUAL COMPOUND RETURNS

The following table shows the percent compounded returns to March 31, 2021 for each series of the Fund for the periods indicated.

It also shows the returns for the Fund's former benchmark as Index 1, which is 75% MSCI World Net (LCL) Total Return Index and 25% FTSE TMX Canada Universe Bond Index; and the Fund's new benchmark as Index 2, which is 52.5% Morningstar Developed Markets Target Market Exposure NR USD, 22.5% Morningstar Developed Markets Target Market Exposure NR EUR, and 25% FTSE Canada Universe Bond Index.

	Series A	Series F	Series I	Series T6	Series F6	Index 1	Index 2
