

Simplified Prospectus

Respecting:

Trust Funds

NCM Balanced Income Portfolio (Series A, Series F, Series F6, Series T6, and Series M Units)

NCM Conservative Income Portfolio (Series A, Series F, Series F6, Series T6, and Series M Units)

NCM Growth and Income Portfolio (Series A, Series F, Series F6, Series T6, and Series M Units)

NCM Norrep Fund (Series A and Series F Units)

NCM Core Income Fund (formerly, NCM Short Term Income Fund) (Series A, Series A (H), Series F, Series F (H), Series I, Series R, and Series Z Units)

- AND -

Class Funds of NCM Opportunities Corp.

NCM Global Income Growth Class (Series A, Series F, Series F6, Series I and Series T6 Shares)

NCM Income Growth Class (Series A, Series AA, Series F, Series F6, Series I, Series R, and Series T6 Shares)

NCM Small Companies Class (Series A, Series F, and Series I Shares)

NCM Core American (Series A, Series F, Series R, and Series Z Shares)

- AND -

Class Funds of NCM Core Portfolios Ltd.

NCM Core Canadian (Series A, Series F, Series R, Series Z, and Series M Shares)

NCM Core Global (Series A, Series F, Series R, Series Z, Series M and ETF Series Shares)

NCM Core Global issues ETF Series securities directly to the Designated Broker and ETF Dealers. National Bank Financial Inc. acts as a Designated Broker and an ETF Dealer for the ETF Series securities of this Fund.

The ETF Series securities of NCM Core Global are listed on the Toronto Stock Exchange (“TSX”) and are offered on a continuous basis. Holders of ETF Series securities can buy or sell ETF Series securities of NCM Core Global on the TSX or another exchange or marketplace through registered brokers and dealers in the province or territory where the investor resides. Investors may incur customary brokerage commissions in buying or selling the ETF Series securities of this Fund.

No underwriter has been involved in the preparation of this simplified prospectus or has performed any review of the contents of this simplified prospectus.

No securities regulatory authority has expressed an opinion about these securities and it is an offence to claim otherwise. The Funds and the securities of the Funds offered under this Simplified Prospectus are not registered with the U.S. Securities and Exchange Commission and may be offered and sold in the United States only pursuant to an exemption from registration.

GLOSSARY

In this Simplified Prospectus:

“Applicable Market Index” means the BMO Small Capitalization Equity Only Weighted Total Return Index.

“Basket of Securities” means, in relation to the ETF Series of a Fund, a group of securities and/ or assets determined by the Manager from time to time, representing the constituents of the Fund.

“Bear Horizons ETFs” means the exchange traded funds managed by Horizons ETFs Management (Canada) Inc. that take positions in financial instruments and/ or equity securities to seek twice the inverse daily returns of a specified underlying index or benchmark, before fees, expenses, distributions, brokerage commissions, and other transaction costs.

“Business Day” means a day other than a Saturday, Sunday or statutory holiday in the province of Alberta or Ontario.

“CDS” means CDS Clearing and Depository Services Inc.

“CDS Participant” means a participant in CDS.

“CIC” means Cumberland Investment Counsel Inc.

“Class Fund” or **“Class Funds”** means one or more Funds that is a class of NCM Opportunities or of NCM Core Portfolios.

“Constituent Securities” means for each Fund that offers ETF Series securities, the issuers included in the portfolio of that Fund from time to time.

“CPL” means Cumberland Partners Limited.

“CPWM” means Cumberland Private Wealth Management Inc.

“CSA” means the Canadian Securities Administrators.

“Designated Broker” means a registered dealer, that has entered into a designated broker agreement with the Manager, on behalf of one or more Funds offering securities of an ETF Series, pursuant to which the

Designated Broker agrees to perform certain duties in relation to such securities.

“Distribution Record Date” means a date designated by the Manager as a record date for the determination of securityholders entitled to receive a distribution or dividend from an ETF Series of a Fund.

“ETFs” means exchange-traded funds.

“ETF Dealer” means a registered dealer (that may or may not be a Designated Broker) that has entered into a continuous distribution agreement with the Manager, on behalf of one or more Funds offering securities of an ETF Series.

“ETF Series” means, if applicable, the exchange-traded series of a Fund.

“Fund(s)” means one or more of the Trust Funds and Class Funds listed on the front cover of this Simplified Prospectus.

“Horizons ETFs” means the exchange traded funds currently managed by Horizons ETFs Management (Canada) Inc. and such other similar funds managed by Horizons ETFs Management (Canada) Inc. in the future.

“Independent Review Committee” or **“IRC”** means the independent review committee for the Funds as contemplated under NI 81-107.

“Manager” means NCM Asset Management Ltd., the manager of the Funds and the portfolio manager of certain Funds.

“MER” means management expense ratio.

“Methodology” means the Investment Risk Classification Methodology in NI 81-102 that came into force effective September 1, 2017, as such methodology may be amended and updated from time to time.

“Mutual Fund Series” means all series of securities of a Fund other than any ETF Series.

“NAV” means net asset value.

“**NCM Core Portfolios**” means NCM Core Portfolios Ltd., a mutual fund corporation that currently offers two classes of shares, as listed on the cover page of this Simplified Prospectus. Each class is considered a separate mutual fund with its own investment objectives.

“**NCM Opportunities**” means NCM Opportunities Corp., a mutual fund corporation that currently offers four classes of shares, as listed on the cover page of this Simplified Prospectus. Each class is considered a separate mutual fund with its own investment objectives.

“**NI 81-102**” means National Instrument 81-102 - *Investment Funds*.

“**NI 81-107**” means National Instrument 81-107 - *Independent Review Committee for Investment Funds*.

“**NIMGI**” means Norrep Investment Management Group Inc.

“**Outperformance Amount**” means, where the performance of a series of a Performance Fee Fund exceeds the Applicable Market Index during a Performance Measurement Period, 20% of the difference between the series performance and the Applicable Market Index performance multiplied by the average series NAV during the Performance Measurement Period (i.e. $20\% \times (\text{series performance} - \text{the Applicable Market Index performance}) \times (\text{average series NAV}) = \text{Outperformance Amount}$).

“**Partnership**” means any of the limited partnerships managed by the Manager or such other limited partnerships as are determined from time to time by the Manager.

“**Performance Fee**” means the performance fee the Manager is entitled to if the series return of the applicable Performance Fee Fund exceeds the return of its Applicable Market Index during the same period.

“**Performance Fee Fund**” means NCM Small Companies Class.

“**Performance Measurement Period**” means a calendar quarter, which is the period the

performance of each series of the Performance Fee Funds is measured for the purposes of determining the Performance Fee.

“**Prescribed Number of Securities**” means the number of ETF Series securities determined by us from time to time for the purpose of subscription orders, exchanges, redemptions or for other purposes.

“**Registered Plan**” means a trust governed by a registered retirement savings plan, registered retirement income fund, registered education savings plan, registered disability savings plan, tax-free savings account, or a deferred profit-sharing plan (all as defined for purposes of the Tax Act).

“**Sub-Advisor**” means Cumberland Investment Counsel Inc., the portfolio manager of certain Funds and investment advisor for all the Funds.

“**Tax Act**” means the *Income Tax Act* (Canada) and the regulations promulgated thereunder, all as amended from time to time.

“**Trading Day**” means a day the TSX is open for trading.

“**Trust Fund**” or “**Trust Funds**” means one or more of the Funds indicated as a trust fund on the front cover of this Simplified Prospectus.

“**Trustee**” means the trustee of the applicable Trust Fund.

“**TSX**” means the Toronto Stock Exchange.

“**Underlying NCM Funds**” means a combination of different types of investment funds managed or advised by the Manager or its affiliates that a Fund may invest in, including each of the Funds. The Underlying NCM Funds and other underlying funds in which a Fund invests may change from time to time.

“**Valuation Time**” means, on each Trading Day, either 4:00 p.m. (Toronto time) or immediately before the TSX closes for the day, whichever is earlier.

“**We**”, “**us**”, “**our**” and “**NCM Investments**” means the Funds, the Manager, portfolio manager and the Trustee, as applicable.

“You” and **“your”** means the person who invests in a Fund.

INTRODUCTION

This Simplified Prospectus contains selected important information to help you make an informed investment decision and to help you understand your rights as an investor.

This document is divided into two parts. The first part, from pages 1 through 45, contains information applicable to all of the Funds. The second part, from pages 45 through 82, contains specific information about each Fund described in this document.

Additional information about each Fund is available in its Annual Information Form, its most recently filed Fund Facts for the Mutual Fund Series, its most recently filed ETF Facts for the ETF Series, its most recently filed annual financial statements and any interim financial report filed after those annual financial statements, and its most recently filed annual management report of fund performance and any interim management report of fund performance filed after that annual management report of fund performance.

These documents are incorporated by reference into this Simplified Prospectus. This means that they legally form part of this document just as if they were printed as a part of this document. You can get a copy of these documents, at your request and at no cost, by:

- writing to us at NCM Asset Management Ltd. - Dome Tower – Suite 1850, 333 – 7th Avenue S.W., Calgary, Alberta T2P 2Z1;
- calling us toll free at 1-877-531-9355;
- e-mailing us at info@ncminvestments.com;
- visiting the Manager's website at www.ncminvestments.com; or
- asking your advisor or dealer.

These documents and other information about each Fund are also available at www.sedar.com.

WHAT IS A MUTUAL FUND AND WHAT ARE THE RISKS OF INVESTING IN A MUTUAL FUND?

WHAT IS A MUTUAL FUND?

A mutual fund is a pool of money contributed by people with similar investment objectives. People who contribute money become securityholders of the mutual fund. The value of an investment in a mutual fund is realized by redeeming the securities held.

HOW ARE MUTUAL FUNDS STRUCTURED?

Mutual funds can be structured as either a class of shares of a mutual fund corporation or as a trust. Each of the Trust Funds is structured as a trust. NCM Opportunities and NCM Core Portfolios are mutual fund corporations and each Class Fund is a class of one of these corporations. Both mutual funds structured as trusts and mutual funds structured as classes of shares of mutual fund corporations allow you to pool your money with other investors. Here are some features you should know about:

- You buy units of a trust fund and shares of a mutual fund corporation. Units and shares both represent ownership. Units and shares can be generally referred to as “**securities**”.
- If a mutual fund corporation has more than one investment objective, each investment objective is represented by a separate class of shares. Each class works like a separate mutual fund. This is how each of NCM Opportunities and NCM Core Portfolios is structured.
- A mutual fund corporation is a single legal entity and taxpayer regardless of how many classes – i.e., separate mutual funds - it offers. A mutual fund corporation must consolidate its income, capital gains, expenses, and capital losses from all the investments made by all of its classes in order to determine the amount of tax payable. For example, capital gains of one class can be offset by capital losses of another class.
- A mutual fund corporation pays dividends while a trust fund pays distributions. A mutual fund corporation may pay capital gains dividends.
- Securities are issued and redeemed on the basis of the NAV of only its specific class and, where applicable, its specific series.
- Investments made by a mutual fund are professionally managed. Investment professionals have training, skills, experience, and access to research and technology that individual investors do not.
- Mutual funds are required to report to you. You are entitled to get detailed ongoing financial and other disclosure about what your fund is investing in and how it is performing. You will be provided with account statements regarding your investment in the mutual fund.
- When a mutual fund generates net income, it is distributed to you. This distribution may be reinvested in additional securities of the mutual fund.

WHAT IS AN ETF SERIES?

The ETF Series are exchange-traded series of securities offered by some of the Funds. ETF Series securities of the Funds are issued and sold on a continuous basis.

The ETF Series securities of NCM Core Global are listed on the Toronto Stock Exchange and are offered on a continuous basis. An investor can buy or sell ETF Series securities of this Fund on the TSX through registered brokers and dealers in the province or territory where the investor resides. Investors may incur customary brokerage commissions in buying or selling the ETF Series securities of this Fund.

WHAT ARE THE RISKS OF INVESTING IN A MUTUAL FUND?

Mutual funds own different types of investments, depending upon the investment objectives of the particular mutual fund. The value of these investments will change from day to day, reflecting changes in interest rates, economic conditions, and market and company news. As a result, the value of a mutual fund's securities may go up or down on a daily basis, and the value of your investment in a mutual fund may be more or less when you redeem it than when you purchased it.

The full amount of your investment in a Fund is not guaranteed. Unlike bank accounts or GICs, mutual fund securities are not covered by the Canada Deposit Insurance Corporation or any other government deposit insurer.

Under exceptional circumstances, a Fund may suspend redemptions. See *Purchases, Switches, and Redemptions*.

Different investments have different types of investment risk. Mutual funds also have different kinds of risk, depending on the securities they own. Below is a summary of the various types of investment risks that may be applicable to mutual funds generally. The second part of this Simplified Prospectus will tell you the specific risks that apply to each Fund.

The Funds may invest in other funds (known as “**underlying funds**”), including funds managed or advised by the Manager or its affiliates (referred to as “**Underlying NCM Funds**”). Thus, the risks of these Funds may correspond to the risks of the underlying funds in which such Funds invest. You should also refer to the risks of each underlying fund. The underlying fund(s) in which a Fund invests may change from time to time.

Individuals have different tolerances for risks. You need to take into account your own comfort with risk as well as the amount of risk suitable for your investment goals.

Borrowing Risk

From time to time, a Fund that offers ETF Series securities may borrow cash as a temporary measure to fund the portion of a distribution payable to you that represents amounts that are owing to, but have not yet been received by, the Fund. Each such Fund is limited to borrowing up to the amount of the portion of the distribution that represents, in the aggregate, amounts that are payable to the Fund, but have not been received by the Fund and, in any event, not more than 5% of the net assets of that Fund. There is a risk that a Fund will not be able to repay the borrowed amount because it is unable to collect the distribution from the applicable issuer. Under these circumstances, the Fund would repay the borrowed amount by disposing of portfolio assets.

Capital Depletion Risk

Some mutual funds may provide distributions that may consist, in whole or in part, of a return of capital of an investor's investment. When a mutual fund returns capital to you, the mutual fund is returning a portion of the money you originally invested in the mutual fund, as opposed to returns or income generated by investment. Returns of capital should not be confused with “yield” or “income” and are not intended to reflect a mutual fund's investment performance. A return of capital reduces the NAV of the particular series on which it was paid. As well, a return of capital reduces the total assets of the mutual fund available for investment, which may reduce the ability of the mutual fund to generate future income.

Class Risk

Each mutual fund that is a class of a mutual fund corporation has its own investment objective and its own fees and expenses, which are tracked separately. Mutual funds structured as classes of a multi-class mutual fund corporation may be exposed to risk because mutual fund corporations are liable for the expenses of each of its classes. This means that there is a risk that the expenses or liabilities of one class of the mutual fund corporation may affect the value of the other classes of that corporation.

Each Class Fund is a class of a mutual fund corporation. This means that if one Class Fund of NCM Opportunities is unable to pay its expenses, NCM Opportunities as a whole will be legally responsible for covering the shortfall. Similarly, if one Class Fund of NCM Core Portfolios is unable to pay its expenses, NCM Core Portfolios as a whole will be legally responsible for covering the shortfall.

Each of NCM Opportunities and NCM Core Portfolios may create new classes and additional series without notice to their shareholders or shareholder approval.

Concentration Risk

If the holdings of a mutual fund are concentrated in one or a small number of issuers or one industry or sector, it is possible that the fund may experience reduced liquidity and diversification. Concentrated holdings may also impact a Fund's ability to satisfy redemption requests. Additionally, if the Fund holds significant investments in a few companies, changes in the value of the securities of those companies may increase the volatility of the NAV of the Fund.

Cyber Security Risk

Cyber security is the risk of harm, loss, or liability resulting from a failure or breach of an organization's technology systems. Cyber security risks can result from deliberate attacks or unintentional events and may be caused by external or internal sources. Examples of cyber attacks include "hacking" or causing denial-of-service attacks on websites, such as making network services unavailable to intended users. Cyber security risks have the ability to negatively impact mutual funds, their investors, and the companies in which they invest in many ways. For example, cyber security risks can disrupt and impact business operations, such as NAV calculations and trading and the businesses of companies in which the Funds invest, and can cause violations of the privacy of investors. While we have established plans and systems designed to address these risks, any plans and systems designed to address cyber security risks are inherently limited as technology and cyber security risks continue to evolve.

Derivative Risk

A derivative is a contract or security whose value and cash flow pattern is derived from another underlying security, such as a stock or bond, or from an economic indicator, such as an interest rate or stock market index. Some examples of the most common derivatives are:

- A forward contract, which is an agreement to buy and sell currency, commodities, or securities at an agreed price for future delivery. Forward contracts are often used to reduce risk.
- An option, which gives the buyer the right, but not the obligation, to buy or sell currency, commodities, or securities at an agreed price within a certain period of time.

Mutual funds may use derivatives with the aim of limiting potential losses associated with currencies, stock markets, and interest rates. This process is called hedging. Mutual funds may also use derivatives for non-hedging purposes, such as aiming to reduce transaction costs, achieve greater liquidity, generate income, and increase speed and flexibility in trading.

Mutual funds may invest in exchange-traded options, futures contracts and options on futures, over-the-counter options, and forward contracts (“**permitted derivatives**”) to the extent and for the purposes permitted by Canadian securities authorities. Mutual funds may also write covered call options. The value of a permitted derivative will change more than proportionately to changes in value of the underlying security. Writing covered call options aims to allow a mutual fund to obtain income related to the premium associated with the option at the time of writing, although any capital gains would be limited by the exercise price of the option. Mutual funds may use permitted derivatives for both hedging and non-hedging purposes.

The primary risk associated with an investment in a permitted derivative is that its value can be reduced to nil or a nominal amount if the price of the underlying security should decrease significantly below the exercise price (in the case of a call option) or increase significantly above the exercise price (in the case of a put option). Also, because permitted derivatives have a limited term, their value is influenced by the length of time to expiry.

Stock index options and futures contracts present the additional risk that index prices may be distorted if trading of certain stocks included in the index is interrupted. Trading in these derivative instruments also may be interrupted if trading is halted in a substantial number of stocks included in the index. If this occurs, the mutual fund would be unable to close out its options and futures positions and, if restrictions on exercise of the options or performance of the futures contracts were imposed, the mutual fund might experience a substantial loss.

Some other risks of investing in derivatives are:

- The use of derivatives for hedging may not be effective. There may be an imperfect correlation between changes in the market value of the investment being hedged and the hedging derivative.
- Some derivatives may limit a mutual fund’s potential for gain as well as loss.
- The cost of entering into and maintaining derivative contracts may reduce a mutual fund’s total return to investors.
- The price of a derivative may not accurately reflect the value of the underlying currency or security.
- There is no guarantee that a market will exist when a mutual fund wants to buy or sell a derivative. This could prevent the mutual fund from making a profit or limiting its losses.
- If the other party (the counterparty) to a derivative is unable to meet its obligations, a mutual fund may experience a loss.
- Securities exchanges may set daily trading limits on derivatives. This could prevent a mutual fund from completing a derivatives transaction.
- There is a risk of loss of margin deposits in the event of bankruptcy of a dealer with whom a mutual fund has an open position in an option or futures or forward contract.
- Derivative investments traded in foreign markets may offer less liquidity and greater credit risk than comparable instruments traded in North American markets.
- If a mutual fund is required to give a security interest related to a derivative, there is a risk that the security interest could be enforced against the mutual fund’s assets.

Equity Risk

The value of a mutual fund that invests in equity securities (also called stocks or shares) will be affected by changes in the market price of those securities. The price of a stock is affected by individual company developments, general economic and financial conditions in those countries where the issuer of the stock is located or does business, or where the stock is listed for trading, and global or regional political, economic, health and/ or banking crises. In addition, a portion of the equity securities invested in by a mutual fund may be of issuers whose securities are not listed on any prescribed stock exchange and thus there may be a lack of a liquid market for resale.

Exchange-Traded Fund (ETF) Risk

Mutual funds may invest in an underlying fund whose securities are listed for trading on a stock exchange (known as an “**exchange-traded fund**” or “**ETF**”). Most ETFs are mutual funds whose securities are purchased and sold on a securities exchange. Some ETFs have a passive investment strategy and some ETFs have an active investment strategy. An index ETF has a passive investment strategy and represents a portfolio of securities designed to track a particular market segment or index. To the extent that an ETF tracks a particular market segment, such as real estate, the value of the ETF will fluctuate as the value of the particular market segment it tracks fluctuates.

An investment in an ETF generally presents the same risks as an investment in a conventional mutual fund that has the same investment objectives and strategies. As well, an investment in an ETF also carries the following additional risks, which do not apply to an investment in conventional mutual funds:

- The performance of an index ETF may be significantly different from the performance of the index, assets, or financial measure that the index ETF is seeking to track. There are several reasons that this might occur, including that ETF securities may trade at a premium or a discount to their NAV and that the total return generated by the index ETF may be reduced by the management fee, transaction costs and other expenses of the Index ETF, whereas such fees, transaction costs and expenses are not included in the calculation of the index.
- An active trading market for ETF securities may fail to develop or fail to be maintained.
- There is no assurance that the ETF will continue to meet the listing requirements of the exchange on which its securities are listed for trading. Also, commissions may apply to the purchase or sale of ETF securities. Therefore, an investment in ETF securities may produce a return that is different than the change in the NAV of these securities.

Each Fund has received approval from the Canadian securities regulators to invest in securities of Horizons ETFs on a limited and controlled basis. The Horizons ETFs are exchange-traded funds that seek to provide returns similar to a particular benchmark market, industry sector index, or commodity, and utilize leverage in an attempt to magnify returns by either a multiple or an inverse multiple of that benchmark, index, or commodity. Investments in the Horizons ETFs are highly speculative and involve a high degree of risk. The Horizons ETFs are also subject to increased volatility as they seek to achieve a multiple or inverse multiple of a benchmark index or commodity. None of the Horizons ETFs is managed by the Manager or an affiliate of the Manager.

Foreign Currency Risk

The Canadian dollar value of a mutual fund’s investments in foreign securities is affected by changes in the value of the Canadian dollar relative to those securities. When the value of the Canadian dollar goes up relative to other currencies, the Canadian dollar value of the fund’s investments in securities denominated in those currencies goes down.

NCM Short Term Income Fund hedges Series A (H) and Series F (H) units against changes in the Canadian currency relative to the U.S. currency and in doing so attempts to reduce the fluctuations between the Canadian and U.S.

currencies. While the Fund will attempt to hedge this risk, there can be no guarantee that it will be successful in doing so. Hedging transactions will be clearly attributable to these specific series. The costs and gains/losses of hedging transactions will accrue solely to the relevant Series A (H) and Series F (H) and will be reflected in the NAV per unit of that series. However, there is no segregation of liability between series of NCM Short Term Income Fund. Unitholders of NCM Short Term Income Fund are exposed to the risk that hedging transactions undertaken in Series A (H) or Series F (H) may impact unfavorably the NAV of the other series.

Foreign Security Risk

The value of foreign securities may be influenced by foreign government policies, lack of information about foreign companies, political or social instability, and the possible levy of foreign withholding tax. There may be lower standards of government supervision and regulation in foreign financial markets. Foreign stock markets may also be less liquid and more volatile. In addition, the securities markets of many countries have at times in the past moved relatively independently of one another due to different economic, financial, political, and social factors. This may reduce gains the mutual fund has derived from movements in a particular market. A mutual fund that holds foreign securities may have difficulty enforcing legal rights in jurisdictions outside Canada.

Fund on Fund Risk

A mutual fund (a “**top fund**”) may invest some or all of its assets in securities of other funds, including ETFs (“**underlying funds**”) – each Fund may invest in this way. In such a case, securityholders of the top fund have no voting rights or ownership in respect of the securities of the underlying funds. In addition, the top fund’s performance is directly related to the investment performance of the underlying funds held by it, including any fees and expenses payable in respect of such underlying funds.

Interest Rate Risk

The value of fixed income securities will generally: (i) rise if interest rates fall; and (ii) fall if interest rates rise. Changes in interest rates may also affect the value of equity securities. Interest rates are affected by regional and global economic and financial conditions and global or regional political, economic, health and/or banking crises.

If a mutual fund invests in money market or fixed income securities (such as bonds), its value is affected by changes in the general level of interest rates. When interest rates fall, bond prices rise. That is because existing bonds pay higher rates than newly issued ones, and so are worth more. When interest rates rise, bond prices fall, and so will the value of funds that hold them.

The income earned by a mutual fund, and the income paid by the mutual fund to its securityholders, are also affected by changes in interest rates.

Investments in Unsecured Indebtedness

Mutual funds may invest, from time to time, in unsecured debt obligations of small capitalization companies. In the event of a default in the repayment of these obligations, the mutual fund’s investment in such indebtedness may be lost in whole or in part.

Legislation Risk

Securities, tax, or other regulators may make changes to legislation, rules, and administrative practice. Those changes may have an adverse impact on the value of a mutual fund.

Low Rated or Unrated Debt Obligations

Mutual funds may invest in instruments that are unrated or have a credit quality rated below investment grade by internationally recognized credit rating organizations. These securities involve significant risk exposure as there is uncertainty regarding the issuer's capacity to pay interest and repay principal in accordance with the terms of the obligations. Low rated and unrated debt instruments generally offer a higher current yield than that available from higher grade issuers, but typically involve greater risk.

NCM Partnerships Risk

Mutual funds may take part in mergers, reorganizations, or other transactions with other funds or investment vehicles.

Class Funds that are part of NCM Opportunities are exposed to additional risk as NCM Opportunities may effect one or more rollover transactions with certain Partnerships on an annual basis. A rollover transaction typically involves the assets of a Partnership being transferred to a Class Fund of NCM Opportunities on a tax-deferred basis, in exchange for shares of that class. The shares of that Class Fund are then distributed to limited partners of the Partnership on a pro rata and tax-deferred basis upon dissolution of the Partnership. In this case, the Class Fund will be subject to the risks of investing in the assets of the Partnership. The assets received from a Partnership may have significant accrued gains at the time they are acquired by NCM Opportunities and the shareholders in NCM Opportunities may receive capital gains dividends as a result of such gains being realized by NCM Opportunities. These capital gains may be realized as a result of shareholders switching between Class Funds of NCM Opportunities, as well as in other circumstances.

For additional details of the risks associated with investing in a Partnership, please see the public disclosure documents of the Partnerships, which are available anytime at www.sedar.com. The content of this public disclosure is expressly not incorporated by reference into this Simplified Prospectus.

Portfolio Management Risk

All actively managed mutual funds are dependent on their portfolio manager to select individual securities or other investments and therefore are subject to the risk that poor security selection or market allocation may cause a mutual fund to underperform relative to its benchmark or other mutual funds with similar investment objectives.

Regulatory Risk

Some industries, such as resource, financial services, health care, and telecommunications, are heavily regulated and may receive government funding. Investments in these sectors may be substantially affected by changes in government policy, such as increased regulation, ownership restrictions, deregulation, or reduced government funding. The value of a mutual fund that buys these investments may rise and fall substantially due to changes in these factors.

Securities Lending, Repurchase, and Reverse Repurchase Risk

Mutual funds may engage in securities lending transactions, repurchase transactions, and reverse repurchase transactions to try to earn additional income and enhance their performance. Securities lending is an agreement whereby a mutual fund lends securities through an authorized agent in exchange for a fee and some form of acceptable collateral. Under a repurchase transaction, a mutual fund agrees to sell securities for cash and at the same time assumes an obligation to repurchase the same securities for cash (usually at a lower price) at a later date. A reverse repurchase transaction is an agreement whereby a mutual fund buys securities for cash and at the same time agrees to resell the same securities for cash (usually at a higher price) at a later date.

There are risks associated with such transactions. If the other party to the transaction defaults in its obligations or goes bankrupt, the mutual fund will be forced to make a claim to try to recover its investment. In the case of a securities lending or repurchase transaction, the mutual fund could incur a loss if the value of the security loaned by the mutual fund or sold by the mutual fund has increased by more than the value of the cash and security held by the mutual fund. In the case of a reverse repurchase transaction, the mutual fund could incur a loss if the value of the securities purchased by the mutual fund decreases relative to the value of the collateral held by the mutual fund. Mutual funds aim to manage the risks associated with these particular investments by:

- Holding collateral equal to a minimum of 102% of the market value of the securities loaned (for securities lending transactions), sold (for repurchase transactions), or purchased (for reverse repurchase transactions), as the case may be.
- Adjusting the amount of collateral each Trading Day with the aim of ensuring that the collateral's value relative to the market value of the securities loaned, sold, or purchased remains within the 102% limit.
- Limiting the aggregate value of all securities loaned or sold through securities lending and repurchase transactions to under 50% of the total assets (without including the collateral) of the mutual fund.

Each Fund may engage in securities lending, repurchase transactions, or reverse repurchase transactions from time to time.

Series Risk

An investor may be subject to certain risks if a mutual fund issues multiple series of securities. Each series has its own fees and expenses, which are tracked separately. A mutual fund may not be able to pay the expenses of one series using that series' proportionate share of the mutual fund's assets. If that were to happen, the mutual fund could be required to pay the shortfall out of the other series' share of the assets. This could lower the investment return of the other series.

Short Selling Risk

A short sale by a mutual fund involves borrowing securities from a lender, which are then sold in the open market. At a future date, the securities are repurchased by the mutual fund and returned to the lender. While the securities are borrowed, the proceeds from the sale are deposited with the lender and the mutual fund pays interest to the lender. If the value of the securities declines between the time that the mutual fund borrows the securities and the time it repurchases and returns the securities to the lender, the mutual fund makes a profit on the difference (less any interest the mutual fund is required to pay the lender).

Short selling involves risk. There is no assurance that securities will decline in value during the period of the short sale and make a profit for the mutual fund. Securities sold short may instead appreciate in value creating a loss for the mutual fund. The mutual fund may experience difficulties repurchasing and returning the borrowed security if a liquid market for the security does not exist. The lender may also recall borrowed securities at any time. The lender from whom the mutual fund has borrowed securities, or the prime broker who is used to facilitate short selling, may go bankrupt and the mutual fund may lose the collateral it has deposited with the lender and/or the prime broker. Mutual funds adhere to controls and limits that are intended to reduce these risks by short selling only securities with a certain amount of liquidity and by limiting the amount of exposure for short sales. Mutual funds also deposit collateral only with Canadian lenders that are regulated financial institutions or regulated dealers and only up to certain limits.

Small, Mid and Micro Capitalization Company Risk

Investments in small, mid, and micro capitalization companies may involve greater risks than investments in larger, more established companies since such companies may have more limited markets and financial resources, their

securities may be more sensitive to market changes and they are often newer and may not have a track record. As well, the liquidity of the securities of such companies may be limited. Consequently, in order to fund redemptions, a mutual fund may have to liquidate its securityholdings in the more liquid securities it holds of large and medium-sized companies. In addition, to the extent that liquidity is limited, the mutual fund's ability to realize profits and/or minimize losses may be limited, which could adversely affect the NAV of the mutual fund.

Taxation Risk

There can be no assurance that tax laws, or the interpretation and application of such laws by courts or government authorities, will not be changed in a manner that adversely affects a mutual fund, its investors, and/or its portfolio assets and holdings.

If a mutual fund organized as a trust (like a Trust Fund) experiences a "loss restriction event": (i) the fund will be deemed to have a year-end for tax purposes (which, in the case of a Trust Fund, would result in an unscheduled distribution of the fund's net income and net realized capital gains, if any, at such time to unitholders so that the fund would not be liable for income tax on such amounts under Part I of the Tax Act); and (ii) the fund will become subject to the loss restriction rules generally applicable to corporations that experience an acquisition of control, including a deemed realization of any unrealized capital losses and restrictions on their ability to carry forward losses. Generally, a mutual fund will be subject to a loss restriction event if a person becomes a "majority-interest beneficiary" of the fund, or a group of persons becomes a "majority-interest group of beneficiaries" of the fund, as those terms are defined in the affiliated persons rules contained in the Tax Act, with appropriate modifications. Generally, a majority-interest beneficiary of a mutual fund will be a beneficiary who, together with the beneficial interests of persons and partnerships with whom the beneficiary is affiliated, has a fair market value that is greater than 50% of the fair market value of all the interests in the income or capital, respectively, in the fund. However, a mutual fund will be exempt from the application of these rules in most circumstances if the fund is an "investment fund" (within the meaning of these rules) by satisfying certain investment diversification and other conditions. Because of the way ETF Series securities are bought and sold, it may not be possible for NCM Short Term Income Fund to determine if or when a loss restriction event has occurred. There can be no assurance that NCM Short Term Income Fund has not been, or will not in the future become, subject to the loss restriction event rules and there can be no assurance regarding when distributions resulting from a loss restriction event will be made.

The Tax Act contains rules concerning the taxation of publicly traded Canadian trusts and partnerships that own certain types of property defined as "non-portfolio property". NCM Short Term Income Fund will be a "SIFT trust" (as defined in the Tax Act) if it holds a "non-portfolio property" (as defined in the Tax Act). That Fund will generally be subject to tax at Canadian corporate income tax rates on income from a non-portfolio property and net taxable capital gains realized on the disposition of a non-portfolio property. Unitholders of that Fund who receive distributions from the Fund of this income and gain will be deemed to receive an eligible dividend from a Canadian corporation for tax purposes. The total of the tax payable by that Fund on its non-portfolio earnings and the tax payable by a unitholder of that Fund on the distribution of those earnings will generally be more than the tax that would have been payable in the absence of the rules in the Tax Act applicable to a SIFT trust and its investor. That Fund is expected to restrict its investments and activities so its non-portfolio earnings (and thus SIFT tax liability) is immaterial for each taxation year; however, no assurance can be given in this regard.

Trading Costs Risk

The investment strategy used by a mutual fund may result in the mutual fund having a higher portfolio turnover rate. Portfolio turnover refers to the frequency of portfolio transactions and the percentage of portfolio assets being bought and sold during the year. A portfolio turnover rate of 100% is the equivalent to a mutual fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the portfolio's turnover rate in a year, the greater the trading costs payable by the mutual fund in the year and the greater the chance of an investor receiving capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a mutual fund.

Additional Risks Associated with Investing in ETF Series

Absence of an Active Market for the ETF Series Securities

Although the ETF Series securities of certain Funds may be listed on the TSX, there can be no assurance that an active public market for these ETF Series securities will develop or be sustained.

Halted Trading of ETF Series Risk

Trading of ETF Series securities on certain marketplaces may be halted by the activation of individual or market-wide “circuit breakers” (which halt trading for a specific period of time when the price of a particular security or overall market prices decline by a specified percentage). In the case of the TSX, trading of ETF Series securities may also be halted if: (i) the ETF Series securities are delisted from the TSX without first being listed on another exchange; or (ii) TSX officials determine that such action is appropriate in the interest of a fair and orderly market or to protect investors.

Trading Price of ETF Series Risk

ETF Series securities may trade in the market at a premium or discount to their NAV. There can be no assurance that ETF Series securities will trade at prices that reflect their NAV. The trading price of the ETF Series securities will fluctuate in accordance with changes in the Fund’s NAV, as well as market supply and demand on the TSX. However, given that generally only a Prescribed Number of Securities are issued to the Designated Broker and ETF Dealers, and that holders of a Prescribed Number of Securities (or an integral multiple thereof) may redeem such ETF Series securities at their NAV, we believe that large discounts or premiums to the NAV of the ETF Series securities should not be sustained.

ORGANIZATION AND MANAGEMENT OF THE FUNDS

The table below shows the companies and persons responsible for providing important services to the Funds. NCM Asset Management Ltd. is the manager, portfolio manager and promoter of the Funds and the trustee of the Trust Funds. The Manager is a direct wholly-owned subsidiary of NIMGI, and each of the Manager, NIMGI, and CIC is a direct or indirect wholly-owned subsidiary of CPL. Except for CIC, none of the other companies and persons listed below is related to the Manager.

Role	Services provided

The IRC prepares, at least annually, a report of its activities for securityholders, which is available at www.ncminvestments.com or at a securityholder’s request, at no cost, by contacting the Manager at info@ncminvestments.com. Additional information about the IRC and fund governance is available in the Funds’ Annual Information Form. The IRC may approve certain mergers involving one or more Funds and any change of the auditor of the Funds. Securityholder approval will not be obtained in these circumstances, but you will be sent a written notice at least 60 days before the effective date of any such merger or change of auditor.</p>

FUND OF FUNDS

Certain Funds may invest some or all of their assets in the Funds or other funds managed or advised by the Manager or its affiliates. These other funds are referred to as “**Underlying NCM Funds**”. The Funds may invest in different Underlying NCM Funds and in varying proportions based on market, economic, or other conditions. The Underlying NCM Funds may change from time to time.

Securityholders of a Fund that invests in securities of one or more Underlying NCM Funds have no voting rights or ownership in respect of the securities of such Underlying NCM Funds. If there is a securityholder meeting with respect to an Underlying NCM Fund, we will not vote the proxies in connection with a Fund’s holdings in such Underlying NCM Fund.

PURCHASES, SWITCHES, AND REDEMPTIONS

GENERAL

Each Fund offers the series of securities indicated on the cover page of this Simplified Prospectus and as set out in each Fund’s profile. We may offer additional series in the future:

- Series A, Series A (H), Series AA, and Series T6 securities are available for purchase by all investors and may be subject to a sales charge.
- Series F, Series F (H) and Series F6 securities may only be purchased by investors who are participants in a fee-for-service or wrap account program sponsored by certain securities dealers, or at the

Manager's discretion. Your representative must notify the Manager if you are no longer enrolled in a fee-for-service or wrap account program. These series are not subject to a sales charge.

- Series I and Series Z securities are available to certain investors at the Manager's discretion. To qualify to purchase Series I securities, you must have entered into an agreement with the Manager relating to your Series I securities.
- Series M securities are not available for general public purchase. The Manager and its affiliates offer wealth management services including fee-based and managed accounts under the Cumberland Private Wealth brand, and the Series M securities are intended for such accounts. You may also qualify to purchase Series M securities if your dealer has entered into an agreement with the Manager relating to your Series M securities.
- Series R securities are only available for investment by the Funds and other funds and accounts managed or advised by the Manager and/or its affiliates and are not available for public purchase.
- ETF Series securities may only be purchased and sold on the TSX or another exchange or marketplace.

NCM Norrep Fund offered Series A under a prospectus from April 12, 2000 until the close of business on March 1, 2005. NCM Norrep Fund was closed to new and additional purchases, except with respect to reinvested distributions, from the close of business on March 1, 2005 until May 21, 2015. It was reopened on May 22, 2015 until December 31, 2015 during which time it offered Series A and Series F units. The Fund was re-opened in respect of Series A and F units on November 9, 2020. The Manager in its discretion may open or close the Fund or any series of the Fund to new and additional purchases at any time.

If you are no longer eligible to hold certain series of securities, we may automatically sell or redesignate your securities to securities of another series of the same Fund. Please see ***Automatic Sales, Redesignations, or Conversions*** for details.

You can buy, switch, or sell securities of the Funds through your dealer. Selling your securities is known as redeeming. All purchases, switches and redemptions of Mutual Fund Series securities are based on the Fund's series NAV per Mutual Fund Series security next determined after we receive your purchase, switch, or redemption request in good order. You can buy or sell ETF Series securities at the market price on the TSX through a registered broker or dealer subject only to customary brokerage commissions.

We usually calculate the series NAV per security at the Valuation Time on each Trading Day. In unusual circumstances, we may suspend the calculation of Fund prices.

We calculate the NAV of each series by adding up the assets attributable to the series and subtracting the liabilities attributable to the series. The NAV per security for the series is equal to the NAV of that series divided by the number of securities of that series outstanding.

For U.S. dollar pricing, NAVs are calculated by converting the Canadian dollar NAV per unit to the U.S. dollar equivalent using the applicable closing rate of exchange as quoted by customary banking sources on each Trading Day.

PURCHASES

Orders to purchase Mutual Fund Series securities must be placed with your mutual fund dealer or securities dealer. Your securities must continue to be held in a dealer's account. The Funds are not registered with the U.S. Securities and Exchange Commission and may be offered and sold in the United States only pursuant to an exemption from registration.

Orders to purchase or sell ETF Series securities can be made through a registered broker or dealer on the TSX or another exchange or marketplace. You may incur customary brokerage commissions in purchasing or selling ETF Series securities. No fees are paid by you to us or a Fund in connection with the purchasing or selling of ETF Series securities on the TSX or another exchange or marketplace. You may pay a commission to your dealer to purchase or sell ETF Series securities.

Mutual Fund Series securities are available in different series and under different purchase options. The choice of different purchase options offered by the Mutual Fund Series of the Funds may require you to pay different fees and expenses and may affect the amount of compensation paid to your dealer by us, depending on the purchase option you choose. See **Fees and Expenses** and **Dealer Compensation** for more information.

Series A (H) and Series F (H) units are offered for purchase in U.S. dollars only.

Unless the Manager otherwise agrees:

- The minimum initial investment in Series A, Series AA, Series F, Series F6, or Series T6 securities is \$5,000 of the respective series securities of a single Fund per account and any additional investments (other than reinvestments) must be at least \$100 of the respective series securities of a single Fund per account.
- The minimum initial investment in Series A (H) or Series F (H) units is US\$5,000 of the respective series units per account and any additional investments (other than reinvestments) must be at least US\$100 of the respective series units per account.
- The minimum initial investment in Series I securities is \$250,000 of Series I securities of a single Fund per account and any additional investments (other than reinvestments) must be at least \$100 of Series I securities of a single Fund per account.
- The minimum initial investment in Series Z securities is (A) \$134,000 for NCM Core Canadian, (B) \$118,000 for NCM Core American, (C) \$134,000 for NCM Short Term Income Fund and (D) \$118,000 for NCM Core Global of a single Fund per account. Any additional investments (other than reinvestments) must be at least \$100 of Series Z securities of a single Fund per account.
- There are no minimum initial or additional investment amounts for ETF Series securities.

Purchases of Series A shares of any Class Fund of NCM Opportunities (other than NCM Core American) are made under either the Front End Sales Charge option or the Low Load Deferred Sales Charge option (as discussed under **Fees and Expenses Payable Directly by You**). The sales charge option you choose will affect the compensation paid to your dealer. Purchases of Series A units of any Trust Fund, Series A shares of any Class Fund of NCM Core Portfolios, Series A shares of NCM Core American, Series A (H) units of NCM Short Term Income Fund or Series T6 securities of any Fund are made under the Front End Sales Charge option. Purchases of Series AA shares of NCM Income Growth Class are made under the Front End Sales Charge option or the Low Load Deferred Sales Charge option. No commission or servicing charge is payable to the Manager for the purchase of Series F, Series F (H), Series F6, Series I, Series M, Series R, Series Z or ETF Series securities.

Effective May 19, 2021, the Low Load Deferred Sales Charge option is closed to new purchases.

Trailing commissions may be payable to your dealer in respect of the purchase of Series A units of any Trust Fund, Series A (H) units of NCM Short Term Income Fund, Series A shares of any Class Fund, Series AA shares of NCM Income Growth Class, and Series T6 securities of any Fund. A sales charge is payable by you to your dealer when you purchase Series A, Series A (H), Series AA or Series T6 of any Fund.

With respect to purchases of Series I securities of any Fund, you may pay a negotiated trailer fee to your dealer under the terms of your arrangement with your dealer. This fee may be paid through the redemption of securities. See ***Fees and Expenses Payable Directly by You*** for more information.

There are no sales charges or commissions payable in respect of purchases of Series M securities and Series R securities.

You may pay a commission to your dealer to purchase or sell ETF Series securities.

Mutual Fund Series Securities

The purchase price for Mutual Fund Series securities is the series NAV per security of the relevant Fund calculated on the same Trading Day if the purchase order is received by the Fund before the Valuation Time. If the purchase order is received after the Valuation Time on a Trading Day or on a day that is not a Trading Day, it will be processed on the next Trading Day. Unless the calculation of Fund prices has been suspended, we calculate the NAVs as at the Valuation Time every Trading Day.

We reserve the right to reject a purchase of Mutual Fund Series securities within one Business Day after receipt by a Fund of the order. In such case, we will refund all cash received immediately in the same currency in which you ordered the securities.

If, for any reason we do not receive payment on or before the second Trading Day following the date on which the Mutual Fund Series purchase order was processed, the Mutual Fund Series securities that were purchased may be redeemed on the next Trading Day in the same currency in which you bought the securities.

If the proceeds of the redemption of the Mutual Fund Series securities exceed the purchase price, the Fund will be entitled to retain the difference. If the proceeds of redemption are less than the purchase price, the Manager will pay the difference to the Fund and will be entitled to collect such amount, together with all costs, charges, and expenses in so doing, from the dealer or the investor from whom the purchase order was received. A dealer may make provision in its arrangements with an investor to be entitled to collect such amount, together with its costs, charges, and expenses in so doing, and interest thereon, from the investor who has failed to settle the order in question. An administration fee of \$50.00 is charged to an investor in respect of any dishonoured cheque or returned wire transfer submitted in payment for a purchase order.

ETF Series Securities

Designated Broker

We, on behalf of each of the Funds that offers ETF Series securities, have entered into a designated broker agreement with a Designated Broker pursuant to which the Designated Broker agrees to perform certain duties relating to these Funds including, without limitation: (i) to subscribe for a sufficient number of ETF Series securities to satisfy the TSX's original listing requirements; (ii) to subscribe for ETF Series securities on an ongoing basis in connection with the rebalancing of and adjustments to the applicable portfolio and when cash redemptions of ETF Series securities occur; and (iii) to post a liquid two-way market for the trading of ETF Series securities on the TSX. We may, in our discretion from time to time, reimburse the Designated Broker for certain expenses incurred by the Designated Broker in performing these duties.

The designated broker agreement provides that we may from time to time and, in any event not more than once quarterly, require the Designated Broker to subscribe for ETF Series securities of a Fund for cash in a dollar amount not to exceed 0.3%, or any amount as mutually agreed, of the NAV of the Fund. The number of ETF Series securities issued will be the subscription amount divided by the NAV per security of the ETF Series next determined following the delivery by us of a subscription notice to the Designated Broker. Payment for the ETF Series securities must be

made by the Designated Broker, and the ETF Series securities will be issued, by no later than the second Trading Day, or such other day as determined by us, after the subscription notice has been delivered.

Issuance of ETF Series to Designated Broker and ETF Dealers

Generally, all orders to purchase ETF Series securities directly from the Funds must be placed by the Designated Broker or ETF Dealers. We reserve the absolute right to reject any subscription order placed by the Designated Broker or ETF Dealer. No fees will be payable by a Fund to the Designated Broker or ETF Dealer in connection with the issuance of ETF Series securities. On the issuance of ETF Series securities, we may, in our discretion, charge an administrative fee to the Designated Broker or ETF Dealer to offset the expenses (including any applicable additional TSX listing fees) incurred in issuing the ETF Series securities.

On any Trading Day, the Designated Broker or ETF Dealer may place a subscription order for the Prescribed Number of Securities (or any multiple thereof) of a Fund. If a subscription order is received by the Fund by the Valuation Time on a Trading Day (or such later time on a Trading Day as we may agree to with the Designated Broker or ETF Dealer), the Fund will issue to the Designated Broker or ETF Dealer the Prescribed Number of Securities (or multiple thereof) based on the NAV of the ETF Series securities determined on that Trading Day. If the subscription order is not received by the Valuation Time on a Trading Day, subject to our discretion, the subscription order will be deemed to be received only on the next Trading Day. The Fund will issue the Prescribed Number of Securities (or multiple thereof) by no later than the second Trading Day after the date on which the subscription order is accepted, provided that payment for such ETF Series securities has been received.

For each Prescribed Number of Securities issued, the Designated Broker or ETF Dealer must deliver payment consisting of, in our discretion: (i) a Basket of Securities and cash in an amount sufficient so that the value of the securities and the cash received is equal to the NAV of the ETF Series securities next determined following the receipt of the subscription order; (ii) cash in an amount equal to the NAV of the ETF Series securities next determined following the receipt of the subscription order; or (iii) a combination of securities and cash, as determined by us, in an amount sufficient so that the value of the securities and cash received is equal to the NAV of the ETF Series securities next determined following the receipt of the subscription order.

The Basket of Securities for each Fund will be made available to such Fund's Designated Broker and ETF Dealers on each Trading Day. We may, in our discretion, increase or decrease the Prescribed Number of Securities from time to time. The Prescribed Number of Securities of each Fund will be available on our website at www.ncminvestments.com.

To Designated Broker in Special Circumstances

ETF Series securities may be issued by a Fund to the Designated Broker in connection with the rebalancing of and adjustments to the Fund or its portfolio and when cash redemptions of ETF Series securities occur.

Buying and Selling ETF Series

Investors are able to buy or sell ETF Series securities through registered brokers and dealers in the province or territory where the investor resides. Investors may incur customary brokerage commissions in buying or selling ETF Series securities. The Funds issue ETF Series securities directly to the Designated Broker and ETF Dealers.

ETF Series securities must be purchased, transferred and surrendered for exchange or redemption by investors only through a CDS Participant. All rights as an owner of ETF Series securities must be exercised through, and all payments or other property to which you are entitled will only be made or delivered by CDS or the CDS Participant through which you hold such securities. Upon purchase of any ETF Series securities, you will receive only the customary confirmation.

From time to time as may be agreed by a Fund and the Designated Broker and ETF Dealers, the Designated Broker and ETF Dealers may agree to accept Constituent Securities as payment for ETF Series securities from prospective purchasers.

The provisions of the so-called “early warning” requirements set out in applicable securities legislation do not apply in connection with the acquisition of ETF Series securities. In addition, the Funds have applied for exemptive relief from the Canadian securities regulatory authorities to permit securityholders to acquire more than 20% of the ETF Series securities of any Fund through purchases on the TSX without regard to the take-over bid requirements of applicable securities legislation, provided that any such securityholder, and any person acting jointly or in concert with the securityholder, undertakes to the Manager not to vote more than 20% of the ETF Series securities of that Fund at any meeting of securityholders.

SWITCHES

Switching between Funds

Switching your securities of a Fund, other than Series A (H) and Series F (H) securities, to securities of another Fund is permitted, provided you are qualified to purchase the series into which you are switching. This involves both a redemption and a purchase, resulting in a taxable disposition of the securities switched. All terms and conditions of the purchase, such as short-term redemption fees, will apply commencing with the date of purchase. See ***Fees and Expenses*** for details. Redeeming or selling your Fund securities is considered a sale for income tax purposes. If you hold your securities in a non-registered account, you will generally realize a capital gain or loss. Capital gains are taxable. For a further discussion of the tax consequences, see ***Income Tax Considerations for Investors***.

The switching of Series A (H) and Series F (H) units of NCM Short Term Income Fund to any series of any other Fund, or vice versa, is not permitted.

Switching into ETF Series securities of another Fund or from ETF Series securities to Mutual Fund Series securities of another Fund is not permitted.

Generally, you may switch your securities on any Trading Day by delivering a written request to your mutual fund or securities dealer that specifies the number and series of securities to be switched. If you purchased any securities under the Low Load Deferred Sales Charge option, you may only switch them to another Low Load Deferred Sales Charge option security. When you switch your securities, your dealer may charge you a fee. You and your dealer negotiate this fee. If we receive instructions to do so, this fee may be deducted from the value of the securities that you switch. See ***Fees and Expenses Payable Directly by You*** for more information.

Redesignation or Conversion Between Series

You may change your securities of one series of a Fund into securities of a different series of the same Fund if you are eligible to purchase the new series, subject to certain restrictions set out below. This change is processed as a redesignation, in the case of a Trust Fund, or a conversion, in the case of a Class Fund, and should not be considered a disposition for tax purposes. Accordingly, you should not realize a capital gain or loss. For a further discussion of the tax consequences, see ***Income Tax Considerations for Investors***.

Here are some things to keep in mind about changing between series:

- You may not change between Series A (H) and Series F (H) units of NCM Core Income Fund and Series A, Series F, and Series I units of NCM Core Income Fund, or vice versa.
- You may change to Series F, Series F6, or Series Z securities of a Fund, or between Series A (H) and Series F (H) units of NCM Core Income Fund, provided you meet the eligibility requirements for the Series F, Series F6, Series F (H), or Series Z securities, as the case may be.

- You may not change between ETF Series securities of a Fund and Mutual Fund Series securities of the same Fund.
- If you purchased any series of securities under the Low Load Deferred Sales Charge option, and a deferred sales charge is still payable on any redemption, you may only change them to another Low Load Deferred Sales Charge option security.
- A redesignation or conversion from one series of a Fund to another series of the same Fund will likely result in a change in the number of securities of the Fund you hold since each series of a Fund generally has a different NAV per security.
- Generally, you may change your securities on any Trading Day by delivering a written request to your mutual fund or securities dealer that specifies the number and series of securities to be changed.

Switching Shares Received on a Rollover

For investors receiving any Mutual Fund Series of shares of any Class Fund of NCM Opportunities on a rollover from a Partnership, no short term redemption fees are payable as a result of one switch to any other Mutual Fund Series of shares of any Class Fund of NCM Opportunities.

Automatic Sales, Redesignations, or Conversions

If the Manager is notified that you no longer meet the eligibility criteria for Series F, Series F (H), Series F6, Series M, Series R or Series Z, we will sell or redesignate or convert your Series F, Series F (H), Series F6, Series M, Series R or Series Z securities in accordance with the instructions from your representative. In the absence of instructions, we may automatically sell your Series F, Series F (H), Series F6, Series M, Series R or Series Z securities or redesignate or convert them to Series A or Series A (H), as applicable. There may be tax implications arising from any sale. See ***Income Tax Considerations for Investors*** for more details.

If you are no longer eligible to hold Series I securities, we may automatically redesignate or convert your securities into Series F securities, as applicable. We will monitor your account on a quarterly basis to determine if an automatic redesignation or conversion of your securities is appropriate. No switch fees will be charged in connection with automatic redesignations or conversions of Series I securities to Series F securities.

REDEMPTIONS

Redeeming Mutual Fund Series Securities

You may redeem Mutual Fund Series securities of a Fund on any Trading Day by delivering a written request to your mutual fund or securities dealer that specifies the number and series of securities to be redeemed. The redemption price of the Mutual Fund Series securities of a Fund is based on the series NAV per security of the applicable Mutual Fund Series of the Fund next determined after the receipt by the Fund of the redemption order. The redemption price will be paid in the currency in which you bought the securities.

When you redeem Mutual Fund Series securities, we reserve the right to charge the short term redemption fee as described under ***Fees and Expenses***. The amount of the short term redemption fee depends primarily on the amount of your original investment and the length of time you own the shares. See ***Fees and Expenses*** and ***Short Term Trading*** below for more information about these fees.

If you select the Low Load Deferred Sales Charge Option when you purchase Series A shares of a Fund or Series AA shares of a Class Fund of NCM Opportunities (other than NCM Core American), you will pay a deferred sales charge if you redeem your securities within three years of buying them. The charge is dependent on the original cost of the securities and does not change regardless of subsequent switches. See ***Fees and Expenses*** for more information.

If you purchase Mutual Fund Series shares of a Class Fund of NCM Opportunities (other than NCM Core American) under the Low Load Deferred Sales Charge Option, you can redeem up to 10% of your shares of such a Fund without paying the low-load redemption fees. At the beginning of each year, we calculate your 10% free redemption amount. This amount is equal to 10% of the number of shares you own. During the year, this amount is adjusted by adding 10% of the new shares purchased under the Low Load Deferred Sales Charge Option and by deducting the number of 10% free shares redeemed earlier in the year. If you do not use all of your 10% free redemption amount in a calendar year, you cannot carry it forward into the next year. We may change or cancel the use of the 10% free redemption program at any time. We will give you at least 60 days' notice of the change or cancellation.

Shares subject to the 10% free redemption amount are deemed to be redeemed first, as applicable. After this, your oldest securities are redeemed.

You will pay no short term redemption fee in respect of redemptions of reinvested Mutual Fund Series securities due to dividend or distribution payments by the Funds or other adjustments we make.

A Mutual Fund Series redemption request received by a Fund before the Valuation Time on a Trading Day will be processed at the series NAV per security calculated at the Valuation Time on that Trading Day. A Mutual Fund Series redemption request received the Valuation Time on a Trading Day, or on a day that is not a Trading Day, will be processed in the same way on the next Trading Day.

If we have not received all required documents on or before the second Business Day following the date on which your redemption request was received, we will notify you that your order is incomplete. If we still have not received all required documents by the tenth Business Day following the date on which your redemption request was received, the applicable Fund may buy back the securities on the next Business Day in the same currency in which you bought the securities. If the cost is less than the proceeds of redemption, the applicable Fund will be entitled to retain the difference. If the cost is greater than the proceeds of redemption, we will pay the difference to the Fund and will be entitled to collect such amount, together with all costs, charges, and expenses in so doing, from the dealer from whom the redemption request was received. A dealer may make provision in its arrangements with an investor to be entitled to collect such amount together with its costs, charges, and expenses in so doing, and interest thereon, from the investor who has failed to settle the order in question.

Unless redemptions are suspended (which may only occur when the determination of the series NAV per security is suspended), payment of the redemption price for Mutual Fund Series securities tendered for redemption will be made (less any fees and tax required to be withheld), upon the direction of the Fund, by the registrar and transfer agent in the same currency in which you bought the securities within two Business Days of the date of processing such redemption.

If redemptions are suspended as described below, you may either withdraw your redemption request or receive payment based on the series NAV per security next determined after the termination of the suspension.

Due to the high cost of maintaining small accounts, we reserve the right to redeem holdings with respect to a Trust Fund or a Class Fund of NCM Opportunities with a current value of less than \$2,500 or with respect to a Class Fund of NCM Core Portfolios with a current value of less than \$1,000, upon ten days' notice to you.

Redeeming and Exchanging ETF Series securities

Redemption of ETF Series Securities for Cash

On any Trading Day, you may redeem ETF Series securities of a Fund for cash at a redemption price per security equal to the lesser of: (i) 95% of the closing price for the ETF Series securities on the TSX on the effective day of the redemption; and (ii) the NAV per security on the effective day of the redemption. Because you will generally be able to sell ETF Series securities at the market price on the TSX through a registered broker or dealer subject only to

customary brokerage commissions, you are advised to consult your broker, dealer or investment advisor before redeeming your ETF Series securities for cash.

In order for a cash redemption to be effective on a Trading Day, a cash redemption request in the form prescribed by us from time to time must be delivered to the applicable Fund at its registered office by 9:00 a.m. on the Trading Day (or such later time on such Trading Day as we may permit). If a cash redemption request is not received by the delivery deadline noted immediately above on a Trading Day, the cash redemption request will be effective only on the next Trading Day. Payment of the redemption price will be made by no later than the second Business Day after the effective day of the redemption. The cash redemption request forms may be obtained from any broker or dealer.

If you exercise this cash redemption right during the period that begins one Business Day prior to a Distribution Record Date and ends on and includes that Distribution Record Date for any distribution, you will not be entitled to receive the applicable distribution in respect of those ETF Series securities.

We will pay redemption proceeds within two Business Days of receiving all necessary redemption documents. If all necessary documents are not received by us within ten Business Days of receiving a redemption request, you will be deemed to repurchase the ETF Series securities on the tenth Business Day at the ETF Series NAV per security calculated that day. The redemption proceeds will be applied to the payment of the issue price of the securities. If the cost to repurchase the ETF Series securities is less than the redemption proceeds, the difference will belong to the applicable Fund. We will pay any shortfall to the applicable Fund, but we may collect such amount, together with the charges and expenses incurred, with interest, from the broker or dealer who placed the redemption request. Your broker or dealer has the right to collect these amounts from you.

Exchange of ETF Series Securities for Baskets of Securities

On any Trading Day, you may exchange the Prescribed Number of Securities (or a multiple thereof) for cash.

To effect an exchange of ETF Series securities, you must submit an exchange request in the form prescribed by us from time to time to the applicable Fund at its registered office by 9:00 a.m. on a Trading Day (or such later time on such Trading Day as we may permit). The exchange price will be equal to the NAV of the ETF Series securities on the effective day of the exchange request, payable by delivery of Baskets of Securities and cash. The ETF Series securities will be redeemed in the exchange.

If an exchange request is not received by the submission deadline noted immediately above on a Trading Day, the exchange order will be effective only on the next Trading Day. Settlement of exchanges for Baskets of Securities and cash will be made by no later than the second Trading Day after the effective day of the exchange request. The securities to be included in the Baskets of Securities delivered on an exchange shall be selected by us in our discretion.

You should be aware that the ETF Series NAV per security will decline on the ex-dividend date of any distribution payable in cash on ETF Series securities. If you are no longer a holder of record on the applicable Distribution Record Date you will not be entitled to receive that distribution.

If Constituent Securities are cease traded at any time by order of a securities regulatory authority or other relevant regulator or stock exchange, the delivery of such securities to a securityholder on an exchange in the Prescribed Number of Securities may be postponed until such time as the transfer of the securities is permitted by law.

Costs Associated with Exchange and Redemption

The Manager may charge the Designated Broker or ETF Dealer, in its discretion, an administrative fee of up to 0.05% of the exchange or redemption proceeds of the Fund to offset certain transaction costs associated with the exchange or redemption of ETF Series securities of a Fund.

Exchange and Redemption of ETF Series Securities through CDS Participants

The exchange and redemption rights described above must be exercised through the broker or dealer (CDS Participant) through which the owner holds ETF Series securities. Beneficial owners of ETF Series securities should ensure that they provide exchange and/or redemption instructions to the CDS Participants through which they hold ETF Series securities sufficiently in advance of the cut-off times described above to allow such CDS Participants to notify CDS and for CDS to notify us prior to the relevant cut-off time.

Suspension of Redemption Rights

Under extraordinary circumstances, we may suspend your right to require a Fund to redeem your securities. Examples of these circumstances include during any period when normal trading is suspended on the TSX or any other stock exchange within or outside Canada on which securities owned by the Fund or an underlying fund, directly or indirectly, are listed and traded, if those securities represent more than 50% of the NAV of the Fund before allowance for liabilities. In addition, we may, with the consent of the Alberta Securities Commission, from time to time suspend your right to redeem any securities during any period in which we determine that conditions exist that render impractical the sale of the assets of the Fund or impair our ability to determine the value of the assets held by the Fund.

Any suspension shall take effect at such time as we declare and thereafter no securities of a Fund will be redeemed until we declare the suspension at an end, except that the suspension will terminate in any event on the first day after the circumstances that gave rise to the suspension cease to exist. All redemptions that would have taken place during the period of suspension will be deemed to occur at the close of business on the first Trading Day after the termination of such suspension unless, prior to such time, you have withdrawn your request for the redemption of such securities.

SHORT TERM TRADING

Excessive trading can harm the Funds' performance by forcing more cash to be kept in the Funds than would be otherwise needed or to sell investments at an inappropriate time. Potential examples of excessive trading includes moving quickly in and out of the Funds or using the Funds as short term investment vehicles. In order to deter short term trading, the Manager reserves the right to charge a short term redemption fee of 2.00% if you invest in Mutual Fund Series securities of the Funds for a 30 day period or less. CIBC Mellon Global Securities Services Company, on behalf of the Manager, monitors and detects short term trading and automatically charges a 2.00% short term redemption fee on Mutual Fund Series securities of a Fund invested for a 30 day period or less. The Manager assesses the short term redemption fee charged to an investor on a case by case basis and may, at its absolute discretion, reverse a short term redemption fee that has been charged to an investor. See ***Fees and Expenses*** for more details. The annual information form of the Funds includes a description of all arrangements, whether formal or informal, with any person or company, to permit short term trades of securities of the Funds.

We are currently of the view that it is not necessary to impose any short-term trading restrictions on ETF Series securityholders as ETF Series securities of the Funds are generally traded by investors on an exchange in the secondary market, in the same way as other listed securities. In the few situations where ETF Series of the Funds are not purchased in the secondary market, purchases usually involve the Designated Broker or an ETF Dealer upon whom we may impose a redemption fee, which is intended to compensate the applicable Fund for any costs and expenses incurred in relation to the trade.

OPTIONAL SERVICES

AUTOMATIC REINVESTMENT OF DIVIDENDS AND DISTRIBUTIONS

Generally, we automatically reinvest your distributions or dividends in respect of Mutual Fund Series securities in additional securities of the same series of a Fund. This may not apply to certain types of accounts; please contact your dealer for more information. There is no cost for this service. If you would prefer your dividends and distributions in cash, please contact your dealer and instruct them to make your dividends and distributions payable by cheque.

Except as noted under *Distribution Policy* on page 48, dividends and distributions in respect of ETF Series securities are paid in cash.

AUTOMATIC PURCHASE PLANS

Automatic purchase plans, also known as pre-authorized payment plans, are available to enable you to make regular investments in one or more Mutual Fund Series of the Funds without writing cheques or sending in purchase requests. You can buy Mutual Fund Series securities of the Funds through an automatic purchase plan by completing the appropriate authorization form that your dealer can provide you. Through this plan, you will authorize the deduction of a specified amount from your bank account for the purchase of securities of a Fund on a monthly, quarterly, or annual basis. Your initial investment must be at least \$5,000 of the respective series securities of a single Fund per account (except for Series Z securities, where your initial investment must be at least (A) \$134,000 for NCM Core Canadian, (B) \$118,000 NCM Core American, (C) \$134,000 NCM Core Income Fund and (D) \$118,000 for NCM Core Global of Series Z securities of a single Fund per account) and each subsequent investment must be at least \$100 of the respective series securities of a single Fund per account (US\$5,000 and US\$100, respectively, in the case of Series A (H) or Series F (H) units). We do not charge for this service, although your financial institution may charge you a fee. Normal sales commissions are charged at the time of each purchase. We may change the minimum purchase amount, or terminate the service, by written notice.

AUTOMATIC WITHDRAWAL PLANS

You may elect, through written instruction provided to your dealer, to redeem Mutual Fund Series securities in any Fund(s) on a monthly, quarterly, or annual basis in order to provide you with a predesignated regular payment. All such redemptions are effected at the series NAV per security of the applicable Fund at the time of such redemption and are subject to the conditions described under *Purchases, Switches, and Redemptions*. There is no charge for this service, other than any applicable redemption fees or other charges if you purchased your securities under the Low Load Sales Charge Option. You may modify or rescind the automatic withdrawal plan by written instruction to your dealer.

If your regular withdrawals are greater than the net earnings of your investment in a Fund, you will eventually use up your original investment.

REGISTERED PLANS

You can open certain Registered Plans offered by us through your dealer. We offer the following Registered Plans:

- Registered retirement savings plans (“RRSPs”), including:
 - Spousal RRSPs
 - Locked-in retirement accounts
 - Locked-in retirement savings plans
 - Restricted locked-in savings plans

- Registered retirement income funds (“RRIFs”), including:
 - Spousal RRIFs
 - Locked-in retirement income funds
 - Restricted life income funds
- Tax-free savings accounts

The terms and conditions of these Registered Plans are set forth in the applicable application form and in the declaration of trust. A third-party trustee acts as the trustee of the Registered Plans we offer. There may be fees and expenses associated with some of the Registered Plans we offer. See **Fees and Expenses Payable Directly by You** for more details.

FEES AND EXPENSES

This table lists the fees and expenses that, as an investor, you may have to pay, directly or indirectly, if you invest in a Fund. You may have to pay some of these fees and expenses directly. You may also have to pay some of these fees and expenses indirectly; where a Fund pays any of these fees and expenses directly, this will reduce the value of your investment in the Fund.

FEES AND EXPENSES PAYABLE BY THE FUNDS

Management Fees

Each Fund pays us annual management fees for its management, including investment management of its portfolio. The management fees of the Funds vary. The annual management fees are calculated as a percentage of the applicable series NAV and are calculated and paid monthly by the Funds to the Manager. The fee is subject to HST and other applicable taxes. The table below sets out the aggregate maximum annual rate of the management fees for each series offered by the Funds, except for Series I, Series M, Series R, and Series Z.

To encourage very large investments, and to achieve effective management fees that are competitive, the Manager may agree to a reduction in the management fees charged in respect of particular investors. See **Management Fee Reduction Programs** below.

The Manager may, in certain circumstances, be entitled to a Performance Fee from NCM Small Companies Class. See **Performance Fees** below.

Fund	Management Fee							
	Series A	Series A (H)	Series AA	Series F	Series F (H)	Series F6	Series T6	ETF Series
<u>Trust Funds</u>								
NCM Balanced Income Portfolio	1.80%	-	-	0.80%	-	0.80%	1.80%	-
NCM Conservative Income Portfolio	1.75%	-	-	0.75%	-	0.75%	1.75%	-
NCM Growth and Income Portfolio	1.85%	-	-	0.85%	-	0.85%	1.85%	-
NCM Norrep Fund	2.00%	-	-	1.00%	-	-	-	-
NCM Core Income Fund*	1.25%	1.25%	-	0.75%	0.75%	-	-	0.75%
<u>Class Funds of NCM Opportunities Corp.</u>								
NCM Global Income Growth Class	2.00%	-	-	1.00%	-	1.00%	2.00%	-
NCM Income Growth Class	1.65%	-	2.00%	1.00%	-	1.00%	2.00%	-
NCM Small Companies Class	2.00%	-	-	1.00%	-	-	-	-
NCM Core American	1.85%	-	-	0.85%	-	-	-	-

Management Fee								
Fund	Series A	Series A (H)	Series AA	Series F	Series F (H)	Series F6	Series T6	ETF Series
<u>Class Funds of NCM Core Portfolios Ltd.</u>								
NCM Core Canadian	1.75%	-	-	0.75%	-	-	-	-
NCM Core Global	1.85%	-	-	0.85%	-	-	-	0.85%

* See the cover page of this Simplified Prospectus for the Fund's previous name.

The management fees pay for the services that we provide to the Funds, including the following:

- Portfolio and investment advisory services.
- Oversight of any service providers to the Funds.
- General administration of Fund operations.
- Marketing and other promotional activities.
- Arranging for the distribution and sale of securities of the Funds.
- Commissions to advisors and dealers.

Performance Fees

The Manager is entitled to a Performance Fee if the series return of the applicable Performance Fee Fund exceeds the return of its Applicable Market Index during the same period. The Performance Fee is based on the Outperformance Amount. The Performance Fee Funds accrue daily an estimate of the Performance Fee in respect of each series of shares calculated in the manner described below. The Performance Fee is in addition to the management fee described above. As a result, when you redeem shares in any of these Funds, since the Performance Fee is reflected in the NAV of the series, you have paid for your proportionate share of the Performance Fee. When you purchase shares of these Funds, the amount you pay has already been reduced by any Performance Fee accrued.

While each Performance Fee Fund accrues the Performance Fee, the Manager is only entitled to be paid the Performance Fee if certain conditions are met.

The Performance Fee is based on the performance of each series of the Performance Fee Fund over a Performance Measurement Period. Generally, in order to determine if a Performance Fee will be payable, the series return is compared to the return of the Applicable Market Index over the Performance Measurement Period. If the series performance exceeds the Applicable Market Index, 20% of the difference between the series performance and the Applicable Market Index will be multiplied by the average series NAV during the Performance Measurement Period. This is 20% times (series performance minus the Applicable Market Index performance) times (average series NAV) = Outperformance Amount.

Example

If: Series Return = 12%

Applicable Market Index Return = 10%

Average Series Net Asset Value = \$20 million

Outperformance Amount = 20% x (12% - 10%) x \$20 million

= 20% x 2% x \$20 million

= \$80,000.00

Even if the Outperformance Amount is positive, the Manager will not be paid the Performance Fee unless:

1. the cumulative return of the series is greater than zero since the last time the Performance Fee was paid to the Manager; and
2. the cumulative return for the series has outperformed the Applicable Market Index since the last time the Performance Fee was paid to the Manager.

The Applicable Market Index for each Fund must reflect the markets in which the Fund invests according to its fundamental investment objectives.

There is no Performance Fee payable on securities of any other Funds, aside from the Performance Fee Fund. However, investors in any Fund that invests in an Underlying NCM Fund subject to a Performance Fee will indirectly pay for any Performance Fee paid to the Manager. This is because the value of the securities of the Underlying NCM Fund held by the top Fund will be reduced by any Performance Fee paid by the Underlying NCM Fund. This applies to all Funds that invest in an Underlying NCM Fund subject to a Performance Fee, even Funds or series that are not directly charged a management fee.

Operating Expenses

Currently, all operating expenses are paid by the Funds, as detailed below.

The operating expenses paid by the Funds include, but are not limited to, administration and accounting costs, applicable taxes, audit and legal fees, trustee fees (for any third party trustee), custodial and recordkeeping fees, computer services, the preparation and distribution of securityholder reports, and fees payable to, and expenses incurred by, the Independent Review Committee.

Each Fund pays its own brokerage commissions for portfolio transactions and related transaction fees. If a Fund is hedged, it pays the costs relating to the foreign currency hedging for that Fund.

Each Fund will pay its prorated share of all reasonable costs and expenses incurred to comply with NI 81-107. These include, but are not limited to, compensation, travel expenses, insurance premiums, continuing education, and other costs and expenses reasonably associated with the members of the Independent Review Committee. Each member of the Independent Review Committee is paid a quarterly retainer of \$3,162.50 (\$6,325.00 for the Chair) plus \$3,712.50 per meeting.

Where applicable, the aggregate of the operating expenses described above are shared among all the Funds and other investment funds, including funds offered by private placement, for which NCM is the investment fund manager.

Where a Fund invests in Underlying NCM Funds, including Series R and ETF Series securities of Underlying NCM Funds, certain expenses will not be payable by the top Fund or the Underlying NCM Fund that would be considered duplicative to a reasonable person.

Management Fee Reduction Programs

In certain circumstances, the Manager may agree to a reduction in the management fees charged in order to achieve management fees that are competitive for such investments. Any reduction in management fees is fully negotiable between the Manager and you. The negotiated fees may vary from investor to investor and may be determined based on a variety of factors, including the size of the investment in the Funds, the expected level of account activity,

and the assets under administration, at the Manager’s sole discretion. The Manager will confirm in writing to your dealer the details of any such reduction to the management fee. The Manager may, in its sole discretion, make changes to or discontinue this practice at any time and without notice to investors.

In the case of a Trust Fund, the amount of the fee reduction will be distributed to the relevant investor as a special distribution, which is made first out of income and capital gains to the extent available, and then out of capital. In the case of a Class Fund, the benefit of such a reduction in management fees will be distributed by the Manager to the relevant investor by a management fee rebate. Management fee distributions and management fee rebates will be automatically reinvested in additional securities of the same series of the Fund at the NAV for such securities on the payment date of the management fee distribution or management fee rebate.

The tax consequences of any fee reduction distribution or rebate made by a Fund will generally be borne by the securityholders receiving the distribution or rebate.

Securityholder Notice

We will give securityholders 60 days’ written notice of any change to the basis of the calculation of the fees or expenses that are charged to a Fund or its securityholders by an arm’s-length party that could result in an increase in charges, or the introduction of a fee or expense to be charged to the Fund or its securityholders by an arm’s-length party that could result in an increase in charges.

Investments in Other Funds

Certain Funds (“**top funds**”) may invest some or all of their assets in other funds (“**underlying funds**”), including the Funds and other funds managed or advised by the Manager or its affiliates (referred to as “**Underlying NCM Funds**”). The fees and expenses payable in connection with management of and investment in any underlying funds are in addition to those payable by any top funds. However, no management fees, performance fees, or other incentive fees are payable by a top fund that, to a reasonable person, would duplicate a fee payable by an underlying fund for the same service. A top fund will not pay any sales fees or redemption fees with respect to the purchase or redemption of securities of an underlying fund if the underlying fund is managed or advised by the Manager or its affiliates and a top fund will not pay any sales fees or redemption fees with respect to the purchase or redemption of securities of any other underlying fund that, to a reasonable person, would duplicate a fee payable by an investor in the top fund.

FEEES AND EXPENSES PAYABLE DIRECTLY BY YOU

Series F / F(H) / F6 Sales Charges	If you purchase Series F, Series F(H) or Series F6 securities of any Fund, you pay no sales charge. However you may be subject to short term redemption fees. See Short Term Redemption Fees below.
<hr/>	
Front End Sales Charges	If you purchase Series A securities of any Fund, Series A (H) units of NCM Core Income Fund, Series AA shares of NCM Income Growth Class, or Series T6 securities of any Fund under the Front End Sales Charges Option, you and your representative negotiate the sales charge you pay at the time of purchase. The sales charge can be between 0.00% and 5.00% of the purchase price, as negotiated between you and your representative, and is deducted from your investment and paid to your representative. However, this fee does not apply to securities purchased through the reinvestment of dividends or distributions.

Low Load Deferred Sales Charges

If you select the Low Load Deferred Sales Charge Option when you purchase Series A shares of any Class Fund of NCM Opportunities (other than NCM Core American), or Series AA shares of NCM Income Growth Class, you will pay a deferred sales charge if you redeem your securities within three years of buying them. The charge is dependent on the original cost of the securities and does not change regardless of subsequent switches. The Low Load Deferred Sales Charge may be waived by us in certain exceptional circumstances, such as in the event of the death of a securityholder.

The following table shows this charge, expressed as a percentage of the cost⁽¹⁾ of securities being sold.

If you sell	You will pay a charge of
During the 1st year	3.00%
During the 2nd year	2.50%
During the 3rd year	2.00%
Thereafter	Nil

(1) *The cost of shares subject to the Low Load Deferred Sales Charge does not include reinvested dividends and is further reduced under the 10% free redemption amount feature. See **Redemptions** for details.*

Effective May 19, 2021, the Low Load Deferred Sales Charge option will be closed to new purchases. As of June 1, 2022, no deferred sales charge is payable to redeem your securities purchased under this purchase option.

Series I

No management fee is charged to a Fund in respect of its Series I securities; rather, the investors who hold Series I securities will pay a negotiated amount directly to the Manager. The amount of the fees and other terms of investing are negotiable, which may vary from investor to investor and may be determined based on a variety of factors, at the Manager’s sole discretion. The aggregate management fees will not exceed an annual rate of 1.00% of the NAV of the series for all of the Funds, except for NCM Core Income Fund. For the aforementioned Fund, the aggregate management fees will not exceed the annual rate of 0.75% of the NAV of the series.

Series M

Series M securities are not available for general public purchase. The Manager and its affiliates offer wealth management services including fee-based and managed accounts under the Cumberland Private Wealth brand, and the Series M securities are intended for such accounts. There are no management fees payable in respect of Series M securities. The accounts managed or advised by the Manager and/or its affiliates that invest in Series M securities are charged an advisory fee directly.

Series R

Series R securities are only available for investment by the Funds and other funds and accounts managed or advised by the Manager and/or its affiliates and are not available for public purchase. There are no management fees payable in respect of Series R securities. The Funds and other funds and accounts managed or advised by the Manager and/or its affiliates that invest in Series R securities are charged a management fee directly for the provision of our services to them.

Series Z

No management fee is charged to a Fund in respect of its Series Z securities. Instead, an annual flat management fee of \$1,000 is paid by investors directly to the Manager per Series Z Account (defined below), charged as follows: (i) the management fee will be charged at a rate of 0.75% for NCM Core Canadian and NCM Core Income Fund, and 0.85% for NCM Core Global and NCM Core American, which will be calculated and paid monthly by the investor to the Manager until an aggregate total of \$1,000 has been paid by the investor to the Manager for the applicable payment period; (ii) once an aggregate total of \$1,000 has been paid by the investor to the Manager for such payment period, no further fees will be paid in respect of the applicable Series Z shares in the Series Z Account until the start of the next payment period; and (iii) for payment periods less than 12 months, the Manager may, at its discretion, *pro rate* the management fee payable.

A “**Series Z Account**” is any investor account that holds a minimum of (A) \$134,000 for NCM Core Canadian, (B) \$118,000 for NCM Core American, (C) \$134,000 for NCM Core Income Fund and (D) \$118,000 for NCM Core Global, up to a maximum size of \$1,000,000 of Series Z securities of a single Fund. Series Z securities of different Funds will not be aggregated in determining whether a Series Z Account has met the minimum amount threshold. If a Series Z Account holds less than the applicable minimum of Series Z securities of a single Fund, the flat fee pricing will not apply and instead an annual management fee of 0.75% for NCM Core Canadian and NCM Core Income Fund, and 0.85% for NCM Core Global and NCM Core American, will be charged in respect of those securities. If a Series Z Account holds \$1,000,000 or more of Series Z shares of a single Fund, any additional Series Z securities of that Fund purchased in the account (other than reinvestments) will not be included in the flat fee price and instead an annual management fee of 0.75% for NCM Core Canadian and NCM Core Income Fund, and 0.85% for NCM Core Global and NCM Core American, will be charged in respect of those additional Series Z securities purchased (and any reinvestments related to such additional shares). An investor may open a subsequent separate Series Z Account in order to qualify for the flat fee pricing in respect of these additional Series Z securities, provided such Series Z Account meets the applicable minimum threshold amount of Series Z securities of a single Fund. Such Series Z Account (and any subsequent Series Z Accounts) will each be subject on a separate basis to the conditions applicable to Series Z Accounts. Fees will be calculated starting from the date of purchase of the applicable Series Z securities. For switches from another Series of a Fund to Series Z securities of the same Fund, any fees paid prior to the date of switch will not be applied in calculating the fee payable for the Series Z securities. We may, on 60 days prior written notice to investors, change the frequency of payment of the management fee in respect of Series Z securities. No change in the frequency of payment shall have the effect of increasing the applicable rate of the management fee set out above and in any event the applicable rate of the management fee set out above for any payment period shall not exceed the applicable rate per annum set out above.

Switch Fees

Your dealer may charge you a fee if you switch between Funds. This fee is negotiated between you and your dealer. If we receive instructions to do so, this fee may be deducted from the value of the securities that you switch. No switch fees will be charged in connection with automatic redesignations or conversions of Series I securities to Series F securities, as applicable.

Short Term Redemption Fees

In order to deter short term trading, you may pay short term redemption fees of 2.00% if you redeem your Mutual Fund Series securities, including securities subsequently acquired through switches, within 30 days from the time of the original date of

purchase. The short term redemption fee you pay is dependent on the cost of the securities you are redeeming, and does not change regardless of subsequent switches.

Short term redemption fees do not apply to redemptions of:

- securities you receive from reinvested dividends or distributions;
- any series of shares of any Class Fund of NCM Opportunities received as a result of a rollover from a Partnership;
- ETF Series securities;
- securities sold as a result of the death of the holder;
- securities sold if you are exercising a statutory right of withdrawal or rescission; or
- securities redeemed under the 10% free redemption amount. See **Redemptions**.

Short term redemption fees also do not apply to redemptions of securities initiated by a Fund. See **Redemptions**.

Your dealer may also charge you an administration fee.

ETF Administration Fee

The Manager may charge to a Designated Broker or ETF Dealer, in its discretion, an administrative fee of up to 0.05% of the exchange or redemption proceeds of the ETF Series securities of a Fund to offset certain transaction costs associated with the exchange or redemption of ETF Series securities of the Fund.

ETF Brokerage Commissions

You are able to buy or sell ETF Series securities through registered brokers and dealers in the province or territory where you reside. You may incur customary brokerage commissions in buying or selling ETF Series securities. The applicable Funds issue ETF Series securities directly to the Designated Broker and the ETF Dealers.

Registered Tax Plan Fees

No fees are charged by us for Registered Plans we offer. Fees may be payable by you to your dealer if you transfer an investment within a Registered Plan offered by us to another financial institution. Please consult your advisor for further information regarding such fees.

If you have a Registered Plan with another discount broker or dealer, please consult with them regarding any fees in relation to the Registered Plan.

IMPACT OF SALES CHARGES

The following table shows the amount of fees that you would have to pay, depending on the series or purchase option selected, if you made an investment of \$1,000 in a Fund, and if you held that investment for one, two, three, five, or ten years and redeemed immediately before the end of that period. See **Fees and Expenses** above.

	At Time of Purchase	1 Year	2 Years	3 Years	5 Years	10 Years
Front End Sales Charge ⁽¹⁾	\$50.00	Nil	Nil	Nil	Nil	Nil
Low Load Deferred Sales Charge ⁽²⁾⁽³⁾	Nil	\$30.00	\$25.00	\$20.00	Nil	Nil
No Load Option (Series F / F (H) / F6 / I / M / R / Z) ⁽²⁾	Nil	Nil	Nil	Nil	Nil	Nil

Notes:

- (1) *The Front End Sales Charge may be between 0.00% and 5.00% of the purchase price.*
- (2) *By applying the 10% free redemption amount, you may be able to reduce the amount of the charge you might otherwise pay. See **Redemptions** for more information.*
- (3) *The fees payable are based upon the original purchase price of the securities at the time of redemption.*
- (4) *If you purchase these series of a Fund, you pay no sales charge. However, you may be subject to short term redemption fees. See **Short Term Redemption Fees** above.*

DEALER COMPENSATION**SALES COMMISSIONS**

Your dealer may receive a sales commission when you invest in Series A securities of any Fund, Series A (H) units of NCM Core Income Fund, Series AA shares of NCM Income Growth Class, or Series T6 securities of any Fund.

Your representative receives part of this commission. With respect to Series A securities of any Trust Fund or any Class Fund of NCM Core Portfolios, Series A (H) units of NCM Core Income Fund, or Series T6 securities of any Fund, the amount of the commission depends upon what amount you negotiate with your representative. The maximum commission allowed is 5.00% of the amount of your investment.

With respect to Series A shares of any Class Fund of NCM Opportunities, or Series AA shares of NCM Income Growth Class, the amount of commission depends upon which sales charge option you choose and what amount you negotiate with your representative. If you choose the Front End Sales Charge option, your representative receives a commission equal to the amount you negotiate with your representative. The maximum commission allowed under this option is 5.00% of the amount of your investment.

There are no sales charges or commissions payable in respect of purchases of Series M securities and Series R securities. You may pay a brokerage commission to your dealer when you purchase or sell ETF Series securities.

The Manager is an indirect wholly-owned subsidiary of CPL. CPL owns 100% of CPWM, which is a registered investment dealer in all of the provinces of Canada and is a member of the Investment Industry Regulatory Organization of Canada (IIROC). CPWM may act as dealer in respect of purchases of securities of the Funds by investors and may earn commissions, including trailing commissions, or other fees in connection with such purchases.

Each of Gary Perron and Gerald Connor holds, directly or indirectly, over 10% of the common shares of CPL, and each is a director, officer, and employee of CPL and/or its subsidiaries. Each of Mr. Perron and Mr. Connor is an advising representative of CPWM. Mr. Perron and Mr. Connor may receive the benefit of commissions received by CPWM with respect to purchases of the Funds by applicable clients, and will also benefit, as a shareholder, from dividends or other distributions of profit from CPL, which is the parent company of CPWM. CPL may receive the benefit of commissions received by CPWM with respect to brokerage transactions conducted by the Funds and may also receive the benefit of purchases of the Funds by CPWM clients. In aggregate, directors, officers, and employees of CPL and its subsidiaries own 100% of the voting securities of CPL, with each of Gary Perron (33.62%), Gerald Connor (20.38%), Peter Jackson (6.32%), and Alexandra von Schroeter (5.24%) holding, directly or indirectly, more than five percent of the voting securities of CPL.

Please see the Funds' Annual Information Form for more information regarding the direct and indirect ownership interests in the Manager.

TRAILING COMMISSIONS

We may also pay your dealer a trailing commission as compensation for the advice and service they provide you in connection with your investment in:

- Series A securities of any Fund;
- Series A (H) units of NCM Core Income Fund;
- Series AA shares of NCM Income Growth Class; and
- Series T6 securities of any Fund.

We do not pay these trailing commissions to discount brokers for securities you purchase through any discount brokerage account. Investors purchasing securities through a discount brokerage should purchase Series F securities.

The trailing commission is a percentage of the daily average series NAV per security of the Fund(s) in each account held by the dealer’s clients. The trailing commission is paid out of the management fees received by the Manager. We may change or terminate the payment of these commissions at any time.

CPWM may act as dealer in respect of purchases of securities of the Funds by investors and may earn trailing commissions in connection with such purchases. Please see **Sales Commissions** above for more information regarding CPWM.

The table below is a summary of the maximum annual trailing commission we pay.

Fund and Purchase Option	First Year	Second Year	Third Year	Fourth Year	Thereafter
Series A – Purchased under any purchase option					
NCM Norrep Fund	1.00%	1.00%	1.00%	1.00%	1.00%
NCM Core Income Fund	0.50%	0.50%	0.50%	0.50%	0.50%
NCM Core Canadian	1.00%	1.00%	1.00%	1.00%	1.00%
NCM Core Global	1.00%	1.00%	1.00%	1.00%	1.00%
Series A – Purchased under the Front End Sales Charge Option					
NCM Balanced Income Portfolio	1.00%	1.00%	1.00%	1.00%	1.00%
NCM Conservative Income Portfolio	1.00%	1.00%	1.00%	1.00%	1.00%
NCM Growth and Income Portfolio	1.00%	1.00%	1.00%	1.00%	1.00%
Any Class Fund of NCM Opportunities, except for NCM Income Growth Class	1.00%	1.00%	1.00%	1.00%	1.00%
NCM Income Growth Class	0.65%	0.65%	0.65%	0.65%	0.65%

Fund and Purchase Option	First Year	Second Year	Third Year	Fourth Year	Thereafter

NCM Global Income Growth Class	1.00%	1.00%	1.00%	1.00%	1.00%
NCM Income Growth Class	1.00%	1.00%	1.00%	1.00%	1.00%

Notes:

- (1) For purchases of Series F, Series F (H), Series F6, Series M, Series R, Series Z and ETF Series securities, we do not pay any trailing commission to your dealer. With respect to purchases of Series F, Series F (H), Series F6, Series M, Series R and Series Z securities, your dealer is paid a negotiated fee under the terms of your arrangement with your dealer.
- (2) With respect to purchases of Series I securities, you may pay a negotiated trailer fee to your representative's firm under the terms of your arrangement with your representative's firm. This fee may be paid through the redemption of securities.

OTHER KINDS OF DEALER COMPENSATION

We may provide your dealer with marketing materials about the Funds and other investment literature, including computer software designed to assist in determining which Funds are most appropriate for clients of the dealer, having regard to the investment objectives and financial conditions of the clients. We may also contribute to the direct costs of your dealer that relate to sales communications or investor education and may also provide your dealer or financial advisor with non-monetary benefits of a promotional nature and of minimal value, all in accordance with the requirements of National Instrument 81-105 - *Mutual Fund Sales Practices*.

DEALER COMPENSATION FROM MANAGEMENT FEES

For the year ended September 30, 2020, approximately 33% of the management fees paid by the Funds were used by us to pay trailing commissions and other fees and commissions to dealers and to fund any marketing, fund promotion, or educational activities in connection with the Funds with dealers.

INCOME TAX CONSIDERATIONS FOR INVESTORS

The following is a general summary of the principal Canadian federal income tax considerations as of the date of this Simplified Prospectus, generally applicable to the acquisition, ownership, and disposition of securities of the Funds by you if, for the purposes of the Tax Act, you are an individual (other than a trust that is not a Registered Plan) resident in Canada, you hold your securities as capital property, and you deal at arm's length and are not affiliated with the Funds.

This summary assumes that each of NCM Opportunities and NCM Core Portfolios will qualify at all times as a "mutual fund corporation", that each of the Trust Funds will qualify at all times as a "mutual fund trust", and that no Trust Fund is a "SIFT trust" for the purposes of the Tax Act.

Securityholders are required to compute their net income and net realized capital gains in Canadian dollars for purposes of the Tax Act.

What follows is only a general summary. You should consult your tax advisor about your own tax situation.

SECURITIES HELD IN A REGISTERED PLAN

The securities of the Funds are qualified investments under the Tax Act for Registered Plans, provided that each of the Trust Funds qualifies or will qualify, and will continue to qualify at all relevant times, as a "mutual fund trust" for purposes of the Tax Act and that each of NCM Opportunities and NCM Core Portfolios qualifies, and will continue to qualify at all relevant times, as a "mutual fund corporation" for the purposes of the Tax Act. If you hold your securities in a Registered Plan, you generally do not have to pay any taxes on distributions or dividends received on those securities while amounts are held in the plan. Also, if those securities are redeemed or sold, generally the capital gain, if any, is not taxable while they are held in the plan. If securities are "prohibited investments" under the Tax Act for a particular Registered Plan, the holder or annuitant will be subject to additional adverse tax consequences as set out in the Tax Act.

Holders or annuitants of certain Registered Plans may be subject to withholdings of tax on amounts withdrawn from Registered Plans. If you intend to hold your securities in a Registered Plan, you should consult your own tax advisor regarding the tax treatment of contributions to, withdrawals from, and acquisitions of property by, such Registered Plan.

A Registered Plan may acquire securities on the redemption of ETF Series securities or on the termination of the ETF Series of a Fund. The securities so received may or may not be qualified investments for the Registered Plan and may or may not be prohibited investments for the Registered Plan. Investors should consult their own tax counsel for advice on whether or not such securities would be qualified investments and not prohibited investments for their Registered Plan.

SECURITIES HELD IN A NON-REGISTERED PLAN

Generally, management fees paid by you on Series I or Series Z securities will not be deductible for tax purposes. You should consult your tax advisor with respect to investments in Series I or Series Z securities.

The unit price or share price of a Fund may include income and/or capital gains that have been accrued, earned or realized but not yet distributed or paid out as a dividend. You will be taxable on distributions of income and capital gains, or on dividends, as the case may be, even if the income or capital gains related to such distribution or dividend is attributable to a time before you acquired the securities. This could be particularly significant if you purchase securities of a Fund late in the year or on or before the date on which a distribution or dividend will be paid.

TURNOVER RATE

A portfolio turnover rate of 100% is the equivalent to a Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the portfolio's turnover rate in a year, the greater the trading costs payable by the Fund in the year and the greater the chance of an investor receiving capital gains dividends or taxable distributions in the year. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.

CLASS FUNDS OF NCM OPPORTUNITIES OR NCM CORE PORTFOLIOS HELD IN A NON-REGISTERED ACCOUNT

Distributions

Distributions from a Class Fund of NCM Opportunities or NCM Core Portfolios will be made either as taxable dividends, as capital gains dividends, or as returns of capital. Capital gains dividends are distributions of capital gains. Distributions in the form of capital gains dividends will be treated in your hands in the same way as capital gains arising on the sale of shares of a Fund. Ordinary dividends are treated as taxable dividends you received directly and are subject to the gross-up and dividend tax credit rules with respect to taxable dividends paid by taxable Canadian corporations under the Tax Act, including the enhanced gross-up and dividend tax credit on "eligible dividends" which are so designated. Returns of capital are not immediately taxable. Instead, a return of capital reduces the adjusted cost base of your shares of the Class Fund of NCM Opportunities or NCM Core Portfolios on which the distribution was made. If the adjusted cost base of your shares is reduced to less than zero, you will be deemed to have realized a capital gain equal to the negative amount and the adjusted cost base of your shares will be increased by the amount of such deemed capital gain.

You will receive a tax slip each year that shows your share of the distributions of NCM Opportunities or NCM Core Portfolios, as the case may be, of :

- taxable dividends;
- capital gains dividends; and/or
- returns of capital.

You must report taxable and capital gains dividends when completing your tax return regardless of whether the amounts were paid to you in cash or reinvested in additional shares.

Generally, management fee rebates must be included in income. You should consult with your own tax advisor regarding whether you could elect to reduce the adjusted cost base of your shares instead.

Conversions

Any conversions of shares between two classes of a single mutual fund corporation (such as NCM Opportunities or NCM Core Portfolios) will be treated as a disposition of those shares at their fair market value and the aggregate cost of the shares received on the conversion will be equal to the fair market value of the shares that were converted. Conversions of a series of one Class Fund of NCM Opportunities or NCM Core Portfolios into a different series of the same Class Fund should not be considered a taxable disposition for purposes of the Tax Act.

UNITS OF A TRUST FUND HELD IN A NON-REGISTERED ACCOUNT

Distributions

Distributions from a Trust Fund will be: (i) made as ordinary income; (ii) designated as foreign source income, taxable dividends, or capital gains; or (iii) a return of capital.

You will generally be required to include in income such portion of the net income of the Trust Fund for that particular year, including the taxable portion of any net realized capital gains, as is paid or becomes payable to you (including by way of management fee distributions). If you receive an amount in excess of your share of the net income of the Trust Fund, this amount generally will not be required to be included in your income but, except to the extent that it constitutes your share of the non-taxable portion of capital gains realized by the Trust Fund, generally will reduce the adjusted cost base of your units.

Distributions that are designated as taxable dividends received by the Trust Fund from taxable Canadian corporations will be subject to the gross-up and dividend tax credit rules normally applicable to such dividends, in the same way as if you had received such dividends directly.

Distributions that are designated as capital gains will be treated in your hands in the same way as capital gains arising on the sale of units of the Trust Fund, as described below.

You may be entitled to claim a foreign tax credit in accordance with the detailed rules in the Tax Act in respect of foreign taxes paid by a Trust Fund designated to you.

You will receive a tax slip each year that shows your share of the Trust Fund's distributions/designations of:

- taxable dividends;
- foreign source income;
- capital gains;
- return of capital; and
- other income.

You must report these amounts when completing your tax return regardless of whether the amounts were paid to you in cash or reinvested in additional units.

Sales or Redemptions in Non-Registered Accounts

At the time you purchase securities of a Fund, your cost (the series NAV of the securities) of the securities may reflect income and gains that have accrued or been realized in the Fund but have not yet been distributed. Such income or gains, which are subsequently distributed to you by way of distributions or dividends, will be taxable. For example, if NCM Norrep Fund distributes its income and capital gains once a year in December (which is the current distribution policy of the Fund) and you buy securities late in the year, you may effectively have to pay tax on the income and gains the Fund earned for the whole year.

If you redeem or otherwise dispose of securities of a Fund (including a deemed disposition on death) for more than their adjusted cost base, you will realize a capital gain. If you redeem or otherwise dispose of securities for less than their adjusted cost base, you will generally realize a capital loss.

If you exchange ETF securities for Baskets of Securities, the proceeds of disposition will generally be equal to the fair market value of the securities received, plus the amount of any cash received on the exchange. The cost for tax purposes of securities acquired by a redeeming holder will generally be equal to the fair market value of such securities at that time.

To calculate your capital gain or capital loss, you must determine the adjusted cost base of the securities sold or redeemed. The adjusted cost base is generally: the amount of your initial investments, including any sales charges paid to your dealer; plus, in the case of shares of a Class Fund the fair market value of shares of another Class Fund switched into the Class Fund on a taxable basis, or the adjusted cost base of shares switched from another series of the Class Fund on a tax-deferred basis; plus reinvested distributions or dividends; minus any distributions that were returns of capital; minus the adjusted cost base of any securities that have been redeemed (including on a conversion). Your capital gain or capital loss is the difference between the proceeds of disposition of the securities sold or redeemed, net of any fees or other expenses paid by you as part of the sale, and the adjusted cost base of those securities.

One-half of any capital gain realized by you on a redemption of securities of a Fund, and one-half of any capital gains dividend paid to you by any Class Fund of NCM Opportunities or NCM Core Portfolios or any capital gain designated to you by a Trust Fund (each called a “**taxable capital gain**”) must be included in your income for tax purposes. One-half of any capital loss realized by you on a redemption of securities of a Fund (called an “**allowable capital loss**”) may be deducted against taxable capital gains realized or deemed to be realized by you in the same taxation year. If you have allowable capital losses in excess of taxable capital gains in a taxation year, that excess may generally be carried back up to three taxation years or forward indefinitely, and deducted against taxable capital gains realized by you in those other taxation years. Dividends and capital gains may give rise to alternative minimum tax.

INTERNATIONAL INFORMATION REPORTING

Pursuant to the Intergovernmental Agreement for the Enhanced Exchange of Tax Information under the Canada-United States Tax Convention and related Canadian legislation found in Part XVIII of the Tax Act, certain securityholders may be requested to provide information to their registered dealer, relating to their citizenship, residency and, if applicable, a U.S. federal tax identification number or such information relating to controlling persons in the case of certain entities. If a securityholder (or a controlling person of certain entities) is identified as a U.S. person (including a U.S. citizen who is resident in Canada) or if a securityholder does not provide the requested information, Part XVIII of the Tax Act will generally require certain information about the securityholder’s investment in a Fund to be reported to the CRA, unless the investment is held in a Registered Plan. It is expected that the CRA will then provide that information to the U.S. Internal Revenue Service.

In addition, Part XIX of the Tax Act implements the Organisation for Economic Cooperation and Development Common Reporting Standard (the “**CRS**”), and requires certain information about the securityholder’s investment in a Fund to be reported to the CRA about accounts maintained for individuals and entities whose residency for tax purposes is in a jurisdiction outside of Canada and the U.S., unless the investment is held in a Registered Plan. It is expected that the CRA will then provide that information to foreign jurisdictions with which it has established a partnership in the context of the CRS.

WHAT ARE YOUR LEGAL RIGHTS?

You may have the right to withdraw from an agreement to buy securities of the Funds within two Business Days of receiving this Simplified Prospectus, Fund Facts or ETF Facts, or to cancel your purchase within 48 hours of receiving confirmation of your order.

Securities legislation in some provinces and territories also allows you to cancel an agreement to buy securities of the Funds and get your money back, or to make a claim for damages, if this Simplified Prospectus, Annual Information Form, Fund Facts, ETF Facts, or financial statements misrepresent any facts about the Funds. These rights must usually be exercised within certain time limits.

We have obtained an exemption from the requirement in securities legislation to include an underwriter’s certificate in the Simplified Prospectus. As such, purchasers of ETF Series securities will not be able to rely on the inclusion of an underwriter’s certificate in the Simplified Prospectus or any amendment for the statutory rights and remedies

that would otherwise have been available against an underwriter that would have been required to sign an underwriter's certificate.

For more information, refer to the securities legislation of your province or territory or consult your lawyer.

ADDITIONAL INFORMATION

Registration and transfer through CDS

Registration of interests in, and transfers of, the ETF Series securities will be made only through CDS. ETF Series securities must be purchased, transferred and surrendered for exchange or redemption only through a CDS Participant. All rights of an owner of ETF Series securities must be exercised through, and all payments or other property to which such owner is entitled will be made or delivered by, CDS or the CDS Participant through which the owner holds such ETF Series securities. Upon purchase of any ETF Series securities, the owner will receive only the customary confirmation; physical certificates evidencing ownership will not be issued. References in this Simplified Prospectus to a holder of ETF Series securities mean, unless the context otherwise requires, the owner of the beneficial interest in such ETF Series securities.

Neither the Funds nor the Manager will have any liability for: (i) any aspect of the records maintained by CDS relating to the beneficial interests in the ETF Series securities or the book-entry accounts maintained by CDS; (ii) maintaining, supervising or reviewing any records relating to such beneficial ownership interests; or (iii) any advice or representation made or given by CDS, whether contained in this simplified prospectus or otherwise, or made or given with respect to the rules and regulations of CDS or any action taken by CDS or at the direction of the CDS Participants.

The rules governing CDS provide that it acts as the agent and depository for the CDS Participants. As a result, CDS Participants must look solely to CDS and persons, other than CDS Participants, having an interest in the ETF Series securities must look solely to CDS Participants for payment made by the Funds to CDS.

Your ability to pledge ETF Series securities or otherwise take action with respect to your interest in such securities (other than through a CDS Participant) may be limited due to the lack of a physical certificate. The Funds have the option to terminate registration of ETF Series securities through the book-entry only system, in which case certificates for ETF Series securities in fully registered form will be issued to beneficial owners of such securities or to their nominees.

Exemptive Relief for FundGrade A+ Awards and FundGrade Ratings

The Funds have received exemptive relief from Canadian securities regulatory authorities to permit the FundGrade A+ Awards and FundGrade Ratings to be referenced in sales communications relating to a Fund, subject to certain conditions.

Exemptive Relief in connection with offering ETF Series securities

The Manager, and the Funds, have also applied for an exemption in connection with the offering of the ETF Series securities to:

1. relieve the Fund from the requirement to prepare and file a long form prospectus for the ETF Series securities in accordance with National Instrument 41-101 *General Prospectus Requirements* in the form prescribed by Form 41-101F2 *Information Required in an Investment Fund Prospectus*, subject to the terms of the relief, provided that the Fund files a prospectus for the ETF Series securities in accordance with the provisions of National Instrument 81-101 *Mutual Fund Prospectus Disclosure*, other than the requirements pertaining to the filing of a fund facts document;

2. relieve the Fund from the requirement that a prospectus offering ETF Series securities contain a certificate of the underwriters;
3. relieve a person or company purchasing ETF Series securities in the normal course, through the facilities of the TSX or another exchange, from the take-over bid requirements of Canadian securities legislation;
4. permit the Fund to borrow cash from the custodian of the Fund and, if required by the custodian of the Fund, to provide a security interest over any of its portfolio assets as a temporary measure to fund the portion of any distribution payable to investors that represents, in the aggregate, amounts that are owing to, but not yet been received by, the Fund; and
5. treat the ETF Series and the Mutual Fund Series of the Fund as if such series were two separate funds in connection with their compliance with the provisions of Parts 9, 10 and 14 of *National Instrument* 81-102.

SPECIFIC INFORMATION ABOUT EACH OF THE MUTUAL FUNDS DESCRIBED IN THIS DOCUMENT

The following explanations are provided to help you more easily understand the specific information about each of the Funds described in this Simplified Prospectus. Any information that is common to the Funds is described previously on pages 1 to 42, inclusive, or below. You should refer back to those pages when reading the individual Fund descriptions to make sure you have complete information about a particular Fund.

FUND DETAILS

This section contains an overview of the Fund – what kind of mutual fund it is, when the Fund was first offered, and the securities offered. This section also identifies whether the securities of the Fund are qualified investments under the Tax Act for Registered Plans.

There are twelve different series currently offered by the Funds. We may offer additional series in the future:

- **Series A** – Series A securities are available for purchase by all investors and may be subject to a sales charge.
- **Series A (H)** - Series A (H) units are available for purchase by all investors and may be subject to a sales charge. This series is offered for purchase in U.S. dollars only.
- **Series AA** - Series AA shares are available for purchase by all investors and may be subject to a sales charge.
- **Series F** – Series F securities may only be purchased by investors who are participants in a fee-for-service or wrap account program sponsored by certain securities dealers, or at the Manager's discretion. Series F securities are not subject to a sales charge.
- **Series F (H)** - Series F (H) units may only be purchased by investors who are participants in a fee-for-service or wrap account program sponsored by certain securities dealers, or at the Manager's discretion. Series F (H) units are not subject to a sales charge. This series is offered for purchase in U.S. dollars only.
- **Series F6** – Series F6 securities may only be purchased by investors who are participants in a fee-for-service or wrap account program sponsored by certain securities dealers, or at the Manager's discretion. Series F6 securities are not subject to a sales charge. Series F6 securities are designed to provide cash flow to investors by making monthly distributions, as described in more detail in the applicable fund profile. These distributions may be comprised, in whole or in part, of a return of capital.
- **Series I** – Series I securities are available to certain investors at the Manager's discretion. To qualify to purchase Series I securities, you must have entered into an agreement with the Manager relating to your Series I securities.
- **Series M** – Series M securities are not available for purchase by the general public purchase. The Manager and its affiliates offer wealth management services, including fee-based and managed accounts, under the Cumberland Private Wealth brand, and the Series M securities are intended for such accounts.
- **Series R** – Series R securities are only available for investment by the NCM Funds and other funds and accounts managed or advised by the Manager and/or its affiliates and are not available for public purchase.

- **Series T6** – Series T6 securities are available for purchase by all investors and may be subject to a sales charge. Series T6 securities are designed to provide cash flow to investors by making monthly distributions, as described in more detail in the applicable fund profile. These distributions may be comprised, in whole or in part, of a return of capital.
- **Series Z** – Series Z shares are available to certain investors at the Manager’s discretion. To qualify to purchase Series Z shares, you must have entered into an agreement with the Manager relating to your Series Z shares. Series Z shares are not subject to a sales charge. Series Z shares are subject to a flat fee pricing model. See **Fees and Expenses** for more details.
- **ETF Series** – ETF Series securities are available for purchase by all investors. Generally, investors purchase such securities on the TSX or another exchange or marketplace through registered dealers.

The specific series offered by each Fund can be found on the cover page of this Simplified Prospectus. See **Purchases, Switches, and Redemptions** for more information regarding each series.

If you are no longer eligible to hold certain series of securities, we may automatically sell or redesignate or convert your securities to securities of another series. Please see **Switches, Automatic Sales, Resignations, or Conversions** for details.

WHAT DOES THE FUND INVEST IN?

This section provides information about each Fund’s fundamental investment objectives and the investment strategies followed in pursuit of those objectives.

Except to the extent the Funds have received exemptive relief from the securities regulators, the Funds are subject to the restrictions and practices contained in securities legislation, including National Instrument 81-102 – *Investment Funds*.

Use of Derivatives

Each Fund may use derivatives to hedge against losses caused by changes in security prices or exchange rates. Each Fund may also use derivatives as a substitute for a stock, stock market, or other security, which is known as a “non-hedging” purpose. Each Fund may write covered call options and cash covered put options and purchase call options and put options with the effect of closing out existing call options and put options written by the Fund. Each Fund may also purchase put options with the aim of protecting the Fund from declines in the market prices of the individual securities in the portfolio or in the value of the portfolio as a whole. Each Fund may enter into trades to close out positions in such permitted derivatives. Each Fund may also use derivatives with the aim of hedging the Fund’s foreign currency exposure. Such permitted derivatives may include exchange-traded options, futures contracts, and options on futures, over-the-counter options, and forward contracts. Each Fund will only use derivatives in accordance with the limits, restrictions, and practices set by securities legislation or as permitted under the terms of exemptive relief obtained from the securities regulators. These transactions will be used with a Fund’s other investment strategies in a manner considered most appropriate to achieving the Fund’s overall investment objectives and enhancing the Fund’s returns.

Short Selling

Each Trust Fund (except for NCM Core Income Fund), NCM Core Global, NCM Core Canadian and each Class Fund of NCM Opportunities may engage in short selling as permitted by the Canadian securities regulatory authorities. Generally speaking, short selling can provide such a Fund with opportunities for gains when markets are volatile or declining. While short selling will be used by such a Fund as a complement to its primary investment strategy (discussed in the Fund’s fund profile), the portfolio manager will utilize the same analysis in determining whether securities of a particular issuer should be sold short. When the analysis produces a favourable outlook, the

investment opportunity may be considered for purchase. When the analysis produces an unfavourable outlook, the investment opportunity may be considered for a short sale.

Each Trust Fund (except for NCM Core Income Fund), NCM Core Global, NCM Core Canadian, and each Class Fund of NCM Opportunities will engage in short selling only within certain limits and conditions including: (i) the Fund will sell short only liquid securities that are traded on a stock exchange or certain government bonds; (ii) the Fund will limit its short sale exposure to any single issuer to 5% of the Fund's total net assets and its aggregate short exposure to 20% of its total net assets; (iii) the Fund will hold cash cover in an amount (including the Fund's assets deposited with lenders) that is at least 150% of the aggregate market value of all securities sold short; and (iv) the Fund will deposit collateral only with lenders that are regulated financial institutions or registered dealers in Canada.

Investment in Horizons ETFs

Each Trust Fund (except for NCM Core Income Fund), NCM Core Global, NCM Core Canadian, and each Class Fund of NCM Opportunities may purchase securities of Horizons ETFs, provided that the investment is in accordance with such Fund's investment objective and that no more than 10% of the net assets of the Fund, taken at market value at the time of the purchase, would consist of securities of Horizons ETFs. In addition, any such Fund that engages in short selling may not purchase securities of a Bear Horizons ETFs or sell any security short if, immediately after the transaction, the aggregate market value of: (i) all the securities sold short by the Fund; and (ii) all the securities of Bear Horizons ETFs held by the Fund, would exceed 20% of the Fund's net assets, taken at market value at the time of the transaction. Also, each Trust Fund (except for NCM Core Income Fund), NCM Core Global, NCM Core Canadian, and each Class Fund of NCM Opportunities will not invest in a Horizons ETF with an underlying index based, directly or indirectly through a specified derivative or otherwise, on a physical commodity other than gold. None of the Horizons ETFs is managed by the Manager or an affiliate of the Manager.

Securities Lending, Repurchase, and Reverse Repurchase Transactions

Each Trust Fund (except for NCM Core Income Fund), NCM Core Global, NCM Core Canadian, and each Class Fund of NCM Opportunities may engage in securities lending, repurchase, and reverse repurchase transactions (see ***General Investment Risks*** for a description of these transactions) as permitted by securities legislation. These transactions will be used with a Fund's other investment strategies in a manner considered most appropriate to achieving the Fund's overall investment objectives and enhancing the Fund's returns.

Portfolio Turnover

A Fund's investments may be actively traded. This can increase trading costs, which lower the Fund's returns. It also increases the possibility that you will receive taxable distributions if you do not hold the Fund in a Registered Plan.

WHAT ARE THE RISKS OF INVESTING IN THE FUND?

The material risks that are associated with investing in the Fund and the investment risk classification for the Fund is listed in this section.

Investment Risk Classification Method

We assign an investment risk level to each Fund to help you decide whether or not the Fund is appropriate for you. Each Fund can be assigned an investment risk level in one of five risk categories: low, low-to-medium, medium, medium-to-high, or high risk. This information is only a guide.

The investment risk level of each Fund for purposes of disclosure in this Simplified Prospectus and in each Fund Facts or ETF Facts document is required to be determined in accordance with a standardized risk classification methodology that is based on the Fund's historical volatility as measured by the ten year standard deviation of the returns of the Fund. The methodology used to determine each Fund's investment risk level is based on the

Methodology. The Methodology reflects the view of the CSA that the most comprehensive, easily understood form of risk in this context is historical volatility risk as measured by the standard deviation of fund performance. However, the Manager and the CSA recognize that other types of risk, both measurable and non-measurable, may exist. It is important to note that historical performance may not be indicative of future returns and a Fund's historical volatility may not be indicative of its future volatility. There may be times when the Methodology produces a result that the Manager believes is inappropriate, in which case the Manager may reclassify the Fund to a higher risk level, if appropriate.

Based on the Methodology, each Fund's risk level, as described in this document, is determined by calculating its ten-year standard deviation. If a Fund does not have at least ten years of performance history, the investment risk level of the Fund is calculated by using the actual return history of the Fund, and imputing the return history for the remainder of the ten year period by using the performance history of a similar fund, or an underlying fund in the case where the Fund invests substantially all of its assets in an underlying fund, and/or, where neither of these alternatives apply, a reference index that is expected to reasonably approximate the Fund's standard deviation.

The risk level for each Fund is determined when the Fund is first created and is reviewed at least annually and/or any time a material change occurs in the Fund.

The standardized risk classification methodology used to identify the investment risk level of each Fund is available on request, at no cost, by calling toll free 1-877-531-9355 or by writing to the Manager at Dome Tower – Suite 1850, 333 – 7th Avenue S.W., Calgary, Alberta T2P 2Z1 or at info@ncminvestments.com.

WHO SHOULD INVEST IN THE FUND?

This section describes, in a general way, the type of portfolio or investor the Fund may be suitable for. This information is intended as a general guide only. The suitability of the Fund for you will depend upon your own circumstances.

DISTRIBUTION POLICY

This section describes how often and when the Fund pays dividends, or distributes its income, capital gains, and any returns of capital. The Manager may adjust the amount of any dividends or distributions for any series of any Fund without notice at any time as market conditions change. For each Fund and series, the amount of any dividends or distributions, if any, will be determined at the discretion of the Manager.

When a Fund returns capital to you, the Fund may be returning a portion of the money you originally invested in the Fund, as opposed to returns generated by investment. Certain Funds and series, including Series F6 and Series T6 securities, may make distributions that contain a return of capital. Returns of capital should not be confused with "yield" or "income" and are not intended to reflect a Fund's investment performance. See ***What are the Risks of Investing in a Mutual Fund?*** and ***Income Tax Considerations for Investors*** for further details.

Except for Series T6, Series F6 securities held in non-registered accounts and for ETF Series securities, unless you otherwise direct in writing, any distributions will be automatically reinvested, without charge, in additional securities of the same series at the series NAV per security determined on the date of such distribution or, if such date is not a valuation day, on the next following valuation day.

All distributions by a Fund in respect of ETF Series securities will generally be made in cash. If you subscribe for ETF Series securities during the period that is one Business Day before a Distribution Record Date until that Distribution Record Date, you will not be entitled to receive the applicable distribution in respect of those ETF Series securities.

Each Class Fund of NCM Opportunities will rank equally with each other Class Fund of NCM Opportunities with respect to dividends based on their respective class NAVs. Each Class Fund of NCM Core Portfolios will rank equally with each other Class Fund of NCM Core Portfolios with respect to dividends based on their respective class NAVs.

Each series of each Fund will rank equally with each other series with respect to distributions based on their respective series NAVs.

FUND EXPENSES INDIRECTLY BORNE BY INVESTORS

Mutual funds pay their fees and expenses (including the management fee and performance fee) out of fund assets. This means investors in a fund indirectly pay for these fees and expenses through lower returns. Investors also pay certain fees and expenses directly. See *Fees and Expenses* for details.

The chart in each Fund profile allows you to compare the costs of investing in the Fund with the cost of investing in other mutual funds. It shows the cumulative fees and expenses paid by the Funds that you therefore would have indirectly paid over various time periods if you:

- invested \$1,000 in the Fund;
- earned a total annual return of 5% in each year, which may be different from the Fund's actual return in any given year and is only used for illustrative purposes as required by securities regulators; and
- paid the same MER each year as you did in the Fund's last completed financial year, excluding the Performance Fee, if applicable, paid by the Fund to the Manager (which, based upon historical market performance, would not have been paid if the Fund had only earned a return of 5%). The MER may be higher or lower depending on the performance of the Fund.

NCM BALANCED INCOME PORTFOLIO: FUND DETAILS

Type of Fund	Global Neutral Balanced

Series M Code	NRP 7211

WHAT DOES THE FUND INVEST IN?

Investment Objectives

The Fund is designed to provide investors with a balance of income and long term capital appreciation by investing, directly or indirectly through investments in underlying funds, in a diversified portfolio of fixed-income securities and equity securities from anywhere in the world.

No material change in the investment objectives of the Fund may be made without the approval of a majority of the votes cast at a meeting of the Fund duly called for that purpose.

Investment Strategies

In accordance with its investment objectives, the Fund aims to maintain a diversified portfolio of securities, either directly or indirectly through investments in underlying funds, including underlying funds managed or advised by the Manager or its affiliates. The equity component of the Fund will generally range between 40% – 60%, while the fixed income component will generally range between 40% - 60%, based upon the portfolio manager’s assessment of market conditions.

It is expected that the Fund will invest primarily in underlying funds managed or advised by the Manager or its affiliates and exchange traded funds.

The Fund may invest up to all of its assets in securities of mutual funds, exchange traded funds, and/or direct securities as it seeks to diversify its exposures across geography, sectors, capitalization, credit quality, and duration. As such, the Fund may invest up to all of its assets in foreign securities.

When selecting an underlying security for the Fund, the portfolio manager will ensure that such investment is consistent with the Fund’s investment objectives and will consider the market exposure of the security, the long term performance track record from a risk and reward perspective, and the associated fees, if any.

The Fund may invest in private placements or other illiquid equity or debt securities of public or private companies as permitted by securities regulations.

The Fund may engage in a limited amount of short selling as well as in securities lending, repurchase, and reverse repurchase transactions. The Fund may also invest in derivatives (including forward contracts, calls, and puts) and in Horizons ETFs. These transactions will be used with the Fund's other investment strategies in a manner considered most appropriate to achieving the Fund's overall investment objectives and enhancing the Fund's returns. Please see ***What Does the Fund Invest In?*** on page 46 for more information.

From time to time, the weightings we select for the underlying securities may differ from the Fund's target asset allocation. We monitor the asset allocation of the Fund on a daily basis and generally will rebalance when we believe that it is strategically appropriate to do so. We may in our discretion perform rebalancing more frequently.

The Fund may depart from its investment objectives and/or investment strategies by temporarily investing all or a portion of its assets in cash or fixed income securities issued or guaranteed by a Canadian or U.S. government, government agency, or company to try to protect it during a market downturn or for other reasons.

WHAT ARE THE RISKS OF INVESTING IN THE FUND?

Investment in the Fund is subject to all risks set forth under ***What are the Risks of Investing in a Mutual Fund?*** except for "Borrowing Risk", "Class Risk" and "Additional Risks Associated with Investing in ETF Series".

INVESTMENT RISK CLASSIFICATION

The risk level of the Fund is **low**. Please see ***Investment Risk Classification Method*** on page 47 for more information.

Since the Fund does not have at least ten years of performance history, the following reference indices have been used to impute the return history for the remainder of the ten year period for which performance history is unavailable: 30% iBoxx USD Liquid Investment Grade Index, 15% FTSE Canada Universe Bond Index, 15% S&P/TSX Composite Total Return Index, 10% S&P 500 Total Return Index, 20% MSCI World Net Total Return LCL Index, 5% S&P Global Infrastructure Total Return Index, and 5% iBoxx USD Liquid High Yield Index.

The iBoxx USD Liquid Investment Grade Index measures the performance of the USD investment grade corporate bond market, with a minimum three years to maturity. The FTSE Canada Universe Bond Index measures the performance of the broad Canadian investment grade bond market. The S&P/TSX Composite Total Return Index measures the broad performance of stocks listed on the TSX. The S&P 500 Total Return Index measures the performance of the broad U.S. economy through changes in the value of 500 stocks representing all major industries. The MSCI World Net Total Return LCL Index measures the performance of developed world markets in local currencies. The S&P Global Infrastructure Total Return Index measures the performance of 75 companies from around the world with the aim of representing diversified exposure to the infrastructure industry. The iBoxx USD Liquid High Yield Index measures the performance of the USD sub-investment grade corporate bond market, with a minimum of one year to maturity.

WHO SHOULD INVEST IN THIS FUND?

Based on the above investment risk classification, the Fund may be suitable for an investor with a low risk tolerance and a longer term investment horizon, seeking current income along with the potential for capital gains. Like most investments, past performance is not guaranteed and therefore, an investor must be willing to risk a loss.

DISTRIBUTION POLICY

For Series A, Series F, and Series M units, distributions for the Fund, if any, are made once a year on or around the end of the calendar year or at the discretion of the Manager.

For Series F6 and Series T6 units, the Fund will make monthly distributions comprised of a return of capital and/or net income on or around the end of each month. A return of capital distribution is not taxable but reduces the

adjusted cost base of your units. You should not confuse this cash flow distribution with the Fund's rate of return or yield. Please see ***Income Tax Considerations for Investors*** for more information.

FUND EXPENSES INDIRECTLY BORNE BY INVESTORS

Expenses Payable Over	One Year	Three Years	Five Years	Ten Years
Series A	\$24.49	\$77.21	\$135.33	\$308.06
Series F	\$13.60	\$42.87	\$75.14	\$171.02
Series F6	\$13.95	\$43.96	\$77.05	\$175.39
Series T6	\$23.99	\$75.63	\$132.56	\$301.71
Series M	\$4.49	\$14.16	\$24.82	\$56.50

Please see ***Fund Expenses Indirectly Borne by Investors*** on page 49 for the required assumptions used in this table, which do not reflect the actual performance of the Fund.

The chart does not account for fees and expenses directly borne by you. See ***Fees and Expenses*** for details.

WHAT DOES THE FUND INVEST IN?

Investment Objectives

The Fund is designed to provide investors with current income and the potential for capital preservation by investing, directly or indirectly through investments in underlying funds, in a diversified portfolio consisting primarily of fixed-income securities and to a lesser extent equity securities from anywhere in the world.

No material change in the investment objectives of the Fund may be made without the approval of a majority of the votes cast at a meeting of the Fund duly called for that purpose.

Investment Strategies

In accordance with its investment objectives, the Fund aims to maintain a diversified portfolio of securities, either directly or indirectly through investments in underlying funds, including underlying funds managed or advised by the Manager or its affiliates. The equity component of the Fund will generally range between 25% – 40%, while the fixed income component will generally range between 60% – 75%, based upon the portfolio manager's assessment of market conditions.

It is expected that the Fund will invest primarily in underlying funds managed or advised by the Manager or its affiliates and exchange traded funds.

The Fund may invest up to all of its assets in securities of mutual funds, exchange traded funds, and/or direct securities as it seeks to diversify its exposures across geography, sectors, capitalization, credit quality, and duration. As such, the Fund may invest up to all of its assets in foreign securities.

When selecting an underlying security for the Fund, the portfolio manager will aim to ensure that such investment is consistent with the Fund's investment objectives and will consider the market exposure of the security, the long term performance track record from a risk and reward perspective, and the associated fees, if any.

The Fund may invest in private placements or other illiquid equity or debt securities of public or private companies as permitted by securities regulations.

The Fund may engage in a limited amount of short selling as well as in securities lending, repurchase, and reverse repurchase transactions. The Fund may also invest in derivatives (including forward contracts, calls and puts) and in Horizons ETFs. These transactions will be used with the Fund's other investment strategies in a manner considered most appropriate to achieving the Fund's overall investment objectives and enhancing the Fund's returns. NCM NORREP FUND: FUND DETAILS

Type of Fund	Canadian Focused Equity
Start up	April 12, 2000 (Series A units) (prior to this date and commencing May, 1997, the Fund was a private mutual fund), and July 6, 2015 (Series F units)
Securities Offered	Series A units and Series F units
Registered Tax Plan Status	Units are eligible for Registered Plans
Status	Closed (initially closed March 1, 2005; temporarily reopened from May 22, 2015 until December 31, 2015). The Fund was re-opened in respect of Series A and Series F units on November 9, 2020.
Series A Code	NRP 101 (Front End Sales Load)
Series F Code	NRP 100

The Fund was closed to new and additional purchases, except with respect to reinvested distributions and rebated management fees, from the close of business on March 1, 2005 until May 21, 2015; it was reopened on May 22, 2015 in connection with the Fund's 15th anniversary, and was closed again on December 31, 2015. The Fund was re-opened in respect of Series A and F units on November 9, 2020. The Manager in its discretion may open or close the Fund or any series of the Fund to new and additional purchases at any time.

WHAT DOES THE FUND INVEST IN?

Investment Objectives

The Fund is designed to achieve long-term capital appreciation and consistent income by investing in equity securities of all market capitalization issuers. The portfolio may consist of all types of equity and debt obligations of issuers in Canada and the United States that may or may not be listed for trading upon the facilities of stock exchanges or other organized and regulated trading facilities in Canada and the United States. Assets of the Fund may also be invested in debt obligations or held in cash to the extent that economic, market, or other conditions make it appropriate.

No material change in the investment objectives of the Fund may be made without the approval of a majority of the votes cast at a meeting of the Fund duly called for that purpose.

Investment Strategies

The Fund invests in a combination of securities including but not limited to government and corporate bonds, short term debt instruments, convertible securities (including convertible bonds and warrants), income trust units, and rights, as well as common and preferred shares. These securities are primarily Canadian, but may also, as market opportunities dictate, include U.S. securities as well. The proportions of the different securities in the Fund's portfolio will vary from time to time based upon the portfolio manager's assessment of market conditions.

The Fund uses a value approach to investments as a primary method to securities selection. This means searching for superior long-term earnings and/or cash flow per share growth companies exhibiting a strong position in the markets in which they operate, quality management, and balance sheet strength. This analysis is supplemented by quantitative techniques that examine movements in general market trends as well as trends in earnings and the price of securities.

Pending the selection and purchase of suitable investments and the payment of expenses or other anticipated distributions, a portion of the assets of the Fund may be held in cash. In addition, during periods in which the portfolio manager believes that market conditions make it advisable, the portfolio manager may reduce the Fund's holdings of investments and hold a portion of the Fund's assets in cash. Such cash balances will be held on deposit in cash accounts at any Canadian bank or trust company or may be invested in short term investment funds or guaranteed investment certificates.

The Fund may engage in a limited amount of short selling as well as in securities lending, repurchase, and reverse repurchase transactions. The Fund may also invest in derivatives (including forward contracts, calls, and puts) and in Horizons ETFs. These transactions will be used with the Fund's other investment strategies in a manner considered most appropriate to achieving the Fund's overall investment objectives and enhancing the Fund's returns. Please see ***What Does the Fund Invest In?*** on page 46 for more information.

The Fund may depart from its investment objectives and/or investment strategies by temporarily investing all or a portion of its assets in cash or fixed income securities issued or guaranteed by a Canadian or U.S. government, government agency, or company to try to protect it during a market downturn or for other reasons.

WHAT ARE THE RISKS OF INVESTING IN THE FUND?

Investment in the Fund is subject to all risks set forth under ***What are the Risks of Investing in a Mutual Fund?*** except for "Borrowing Risk", "Class Risk" and "Additional Risks Associated with Investing in ETF Series".

Significant Investor Risk

As at April 30, 2021, two investors held approximately 32% and 10%, respectively of the units of the Fund. If this investor redeems a large amount of its units of the Fund, the Fund may be required to fund the redemption by selling securities at an inopportune time. This unexpected sale may have a negative impact on the performance of your investment.

INVESTMENT RISK CLASSIFICATION

The risk level of the Fund is **medium**. Please see ***Investment Risk Classification Method*** on page 47 for more information.

As the Fund changed its investment objectives effective as of November 9, 2020, and does not have at least ten years of performance history in respect of its current investment objectives, the following reference indices have been used to impute the return history for the remainder of the ten year period for which performance history is unavailable: 70% S&P/TSX Total Return Index, 30% S&P 500 Total Return Index.

The S&P/TSX Composite Total Return Index measures the broad performance of stocks listed on the TSX. The S&P 500 Total Return Index measures the performance of the broad U.S. economy through changes in the value of 500 stocks representing all major industries.

WHO SHOULD INVEST IN THIS FUND?

Based on the above investment risk classification, the Fund may be suitable for only medium to high risk investors seeking long-term growth who can tolerate volatility. Like most investments, past performance is not guaranteed and therefore, an investor must be willing to risk a loss.

DISTRIBUTION POLICY

Distributions for the Fund, if any, are made once a year on or around the end of the calendar year or at the discretion of the Manager.

Each year, NCM Norrep Fund intends to distribute a sufficient amount of its net income and net realized capital gains for the year to unitholders so that the Fund will not be liable for ordinary income tax. To the extent that the Fund has not otherwise distributed a sufficient amount of its net income or net capital gains, a distribution will be paid to unitholders at the end of the year and that distribution will be automatically reinvested in additional units. Immediately following such reinvestment, the number of units outstanding will be consolidated so that the NAV per unit following the distribution and reinvestment is the same as it would have been if the distribution had not been paid.

FUND EXPENSES INDIRECTLY BORNE BY INVESTORS

Expenses Payable Over	One Year	Three Years	Five Years	Ten Years
Series A	\$27.20	\$85.75	\$150.29	\$342.09
Series F	\$19.20	\$60.53	\$106.10	\$241.51

Please see ***Fund Expenses Indirectly Borne by Investors*** on page 49 for the required assumptions used in this table, which do not reflect the actual performance of the Fund.

The chart does not account for fees and expenses directly borne by you. See ***Fees and Expenses*** for details.

NCM CORE INCOME FUND (FORMERLY, NCM SHORT TERM INCOME FUND): FUND DETAILS

Series A (H) Code	NRP 1107 (Front End Sales Load)
Series F Code	NRP 1100
Series F (H) Code	NRP 1108
Series I Code	NRP 1105
Series R Code	NRP 1103
Series Z Code	NRP 1177

WHAT DOES THE FUND INVEST IN?

Investment Objectives

The Fund is designed to provide investors with capital preservation through a liquid portfolio comprised primarily of government and corporate debt securities targeting a level of income consistent with investments in Canadian fixed income securities. These securities are primarily from Canadian issuers but may also, as market opportunities dictate, include other global issuers subject to CIFSC limits. The portfolio may consist of all types of debt obligations of issuers that may or may not be listed for trading upon the facilities of stock exchanges or other organized and regulated trading facilities. Assets of the Fund may also be invested in equity and equity like securities or held in cash to the extent that economic, market, or other conditions make it appropriate.

No material change in the investment objectives of the Fund may be made without the approval of a two thirds majority of the votes cast at a meeting of the Fund duly called for that purpose.

Investment Strategies

The portfolio will primarily invest in government and corporate debt securities and loans of varying types.

Government Bonds

This category is comprised of government bonds (federal, provincial, state, municipal, etc.) of varying maturities.

Investment Grade Bonds

This category is comprised of corporate bonds rated BBB- and higher by Standard and Poor's or an equivalent bond rating service and having varying maturities.

Floating Rate Senior Loans

This category is comprised of floating rate, secured corporate term loans having varying maturities. Floating rate pricing is intended to provide the portfolio with interest rate protection in the event of rising rates.

High Yield Bonds

This category is comprised of secured and unsecured corporate bonds rated BB+ and below by Standard and Poor's or an equivalent bond rating service and having varying maturities.

Corporate issues will be analyzed using a bottom-up approach to determine credit quality, risk of default, and valuation. The portfolio manager will target corporate issuers that it believes have any or all of the following: conservative management teams, strong business models, and high asset and/or cash flow coverage.

The Fund will invest at least 90% of its fixed income holdings in Canadian dollars with an average duration greater than 3.5 years and less than 9.0 years. The Fund may not invest more than 40% of the portfolio's holdings in high yield fixed income securities and the average credit quality of the portfolio as a whole must be BBB or equivalent rating or higher). Up to 30% of a Fund's assets may be held in Foreign Fixed Income products which will be treated as Canadian content provided that the currency exposure on those holdings is hedged to Canadian Dollars.

The portfolio manager will attempt to fully hedge against foreign exchange risk by holding forward contracts. The Fund offers Series A (H) units and Series F (H) units. The portfolio manager intends to hedge against movements of the Canadian dollar relative to the U.S. dollar. There can be no assurance the Series A (H) and Series F (H) will be hedged at all times or that that currency hedging technique will be successful. No material change in the hedging strategies employed in respect of Series A (H) units and Series F (H) units of the Fund may be made without the requisite approval of applicable unitholders at a meeting of the Fund duly called for that purpose.

Pending the selection and purchase of suitable investments and the payment of expenses or other anticipated distributions, a portion of the assets of the Fund may be held in cash. In addition, during periods in which the portfolio manager believes that market conditions make it advisable, the portfolio manager may reduce the Fund's holdings of investments and hold a portion of the Fund's assets in cash. Such cash balances will be held on deposit in cash accounts at any Canadian bank or trust company or may be invested in short term investment funds or guaranteed investment certificates.

The Fund may engage in securities lending, repurchase, and reverse repurchase transactions.

The Fund's portfolio turnover rate may exceed 70%. This may increase portfolio trading costs and taxable distributions and may therefore affect returns. Please see **Turnover Rate** on page 40 for a discussion of the tax consequences to securityholders.

The Fund may depart from its investment objectives and/or investment strategies by temporarily investing all or a portion of its assets in cash or fixed income securities issued or guaranteed by a Canadian or U.S. government, government agency, or company to try to protect it during a market downturn or for other reasons.

WHAT ARE THE RISKS OF INVESTING IN THE FUND?

Investment in the Fund is subject to all risks set forth under **What are the Risks of Investing in a Mutual Fund?**, except for "Class Risk".

Significant Investor Risk

As at April 30, 2021, two investors held approximately 13% and 11%, respectively, of the units of the Fund. If one or both of these investors redeem a large amount of their units of the Fund, the Fund may be required to fund the redemption by selling securities at an inopportune time. This unexpected sale may have a negative impact on the performance of your investment.

INVESTMENT RISK CLASSIFICATION

The risk level of the Fund is **low**. Please see *Investment Risk Classification Method* on page 47 for more information.

Since the Fund does not have at least ten years of performance history, the following reference indices have been used to impute the return history for the remainder of the ten year period for which performance history is unavailable: 70% FTSE Canada Universe Bond Total Return Index/30% FTSE Canada Investment Grade 1-5 Year Laddered Corporate Bond Total Return Index.

The FTSE Canada Universe Bond Index is designed to track the performance of bonds denominated in Canadian Dollars. Bonds must have an index rating of at least investment grade in order to be eligible for the index.

The FTSE Canada Investment Grade 1-5 Year Laddered Corporate Bond Total Return Index measures the return of a 1-5 year bond ladder in Investment Grade Corporate Bonds (rated BBB or higher).

WHO SHOULD INVEST IN THIS FUND?

Based on the above investment risk classification, the Fund may be suitable for low risk investors seeking capital preservation and a highly liquid portfolio comprised primarily of government and corporate debt securities. Like most investments, past performance is not guaranteed and therefore, an investor must be willing to risk a loss.

DISTRIBUTION POLICY

Distributions for the Fund are paid monthly, on or around the end of each month, at the discretion of the Manager. Distributions paid in cash will be paid in the currency in which the investor bought the units.

Each year, NCM Core Income Fund intends to distribute a sufficient amount of its net income and net realized capital gains for the year to unitholders so that the Fund will not be liable for ordinary income tax. To the extent that the Fund has not otherwise distributed a sufficient amount of its net income or net capital gains, a distribution will be paid to unitholders at the end of the year and that distribution will be automatically reinvested in additional units. Immediately following such reinvestment, the number of units outstanding will be consolidated so that the NAV per unit following the distribution and reinvestment is the same as it would have been if the distribution had not been paid.

FUND EXPENSES INDIRECTLY BORNE BY INVESTORS

Expenses Payable Over	One Year	Three Years	Five Years	Ten Years

This information has not been provided for Series Z because the series is new and has no historical fund expense information.

Please see ***Fund Expenses Indirectly Borne by Investors*** on page 49 for the required assumptions used in this table, which do not reflect the actual performance of the Fund.

The chart does not account for fees and expenses directly borne by you. See ***Fees and Expenses*** for details.

NCM GLOBAL INCOME GROWTH CLASS OF NCM OPPORTUNITIES CORP.: FUND DETAILS

Type of Fund	Global Equity Balanced
Start up	May 31, 2011 (Series A and Series F shares), March 29, 2012 (Series I shares), December 11, 2017 (Series F6 shares), and December 12, 2017 (Series T6 shares)
Securities Offered	Series A shares, Series F shares, Series F6 shares, Series I shares, and Series T6 shares
Registered Tax Plan Status	Shares are eligible for Registered Plans
Series A Codes	NRP 1001 (Front End Sales Load) NRP 1002 (Low Load Deferred Sales Charge)
Series F Code	NRP 1000
Series F6 Code	NRP 1009
Series I Code	NRP 1005
Series T6 Code	NRP 1006

WHAT DOES THE FUND INVEST IN?

Investment Objectives

The Fund is designed to provide investors with a stable monthly stream of cash distributions, which shall be determined on an annual basis by the Manager, and the potential for long term capital appreciation by investing in small, mid, and large capitalization high yield securities. The portfolio may consist of all types of equity and debt obligations of issuers from around the world that may or may not be listed for trading upon the facilities of stock exchanges or other organized and regulated trading facilities. Assets of the Fund may also be held in cash to the extent that economic, market, or other conditions make it appropriate.

No material change in the investment objectives of the Fund may be made without the approval of a majority of the votes cast at a meeting of the Fund duly called for that purpose.

Investment Strategies

The Fund uses a value approach to high yield investments as a primary method to securities selection. This means searching for organizations that are able to maintain and grow their distributions. In addition we will look for factors such as superior long-term earnings and cash flow per share growth, organizations exhibiting a strong position in the markets in which they operate, quality management, and balance sheet strength. This analysis is supplemented by quantitative techniques, which identify potentially attractive securities based on attributes such as valuation, growth, and profitability, as well as trends in earnings and the price of securities.

Pending the selection and purchase of suitable investments and the payment of expenses or other anticipated distributions, a portion of the assets of the Fund may be held in cash. In addition, during periods in which the portfolio manager believes that market conditions make it advisable, the portfolio manager may reduce the Fund's holdings of investments and hold a portion of the Fund's assets in cash. Such cash balances will be held on deposit in cash accounts at any Canadian bank or trust company or may be invested in short term investment funds or guaranteed investment certificates.

The Fund invests in a combination of securities with a minimum 10% allocation to fixed income securities, including, but not limited to, common and preferred shares, REITS, government and corporate bonds, short term debt instruments, convertible securities (including convertible bonds and warrants), and other similar entities. These securities are from issuers around the world, including, but not limited to, the United States, Canada, Europe and the United Kingdom, Asia, and emerging markets. The proportions of the different securities in the Fund's portfolio will vary from time to time based upon the portfolio manager's assessment of market conditions.

The Fund may engage in a limited amount of short selling as well as in securities lending, repurchase, and reverse repurchase transactions. The Fund may also invest in derivatives (including forward contracts, calls, and puts) and in Horizons ETFs. These transactions will be used with the Fund's other investment strategies in a manner considered most appropriate to achieving the Fund's overall investment objectives and enhancing the Fund's returns. Please see ***What Does the Fund Invest In?*** on page 46 for more information.

The Fund may depart from its investment objectives and/or investment strategies by temporarily investing all or a portion of its assets in cash or fixed income securities issued or guaranteed by a Canadian or U.S. government, government agency, or company to try to protect it during a market downturn or for other reasons.

WHAT ARE THE RISKS OF INVESTING IN THE FUND?

Investment in the Fund is subject to all risks set forth under ***What are the Risks of Investing in a Mutual Fund?*** except for "Borrowing Risk" and "Additional Risks Associated with Investing in ETF Series".

INVESTMENT RISK CLASSIFICATION

The risk level of the Fund is **low to medium**. Please see ***Investment Risk Classification Method*** on page 47 for more information.

Since the Fund does not have at least ten years of performance history, the following reference indices have been used to impute the return history for the remainder of the ten year period for which performance history is unavailable: 75% MSCI World Net Total Return Local Index and 25% Merrill Lynch Canadian High Yield Index.

The MSCI World Net Total Return Local Index measures large and mid cap performance across 23 developed markets countries. The Merrill Lynch Canadian High Yield Index tracks the performance of U.S. dollar and Canadian dollar denominated below-investment-grade corporate debt publicly issued by Canadian issuers in the Canadian or U.S. domestic markets.

WHO SHOULD INVEST IN THIS FUND?

Based on the above investment risk classification, the Fund may be suitable for only low to medium risk investors seeking long-term growth who can tolerate volatility. Like most investments, past performance is not guaranteed and therefore, an investor must be willing to risk a loss.

DISTRIBUTION POLICY

Dividends for the Fund, if any, are paid monthly, on or around the end of each month, at the discretion of the Board of Directors.

For Series F6 and Series T6 shares, the Fund will also make monthly distributions comprised of a return of capital and/or dividends on or around the end of each month. A return of capital distribution is not taxable but reduces the adjusted cost base of your shares. You should not confuse this cash flow distribution with the Fund's rate of return or yield. Please see ***Income Tax Considerations for Investors*** for more information.

FUND EXPENSES INDIRECTLY BORNE BY INVESTORS

WHAT DOES THE FUND INVEST IN?

Investment Objectives

The Fund is designed to provide investors with a stable monthly stream of cash distributions, which shall be determined on an annual basis by the Manager, and the potential for long term capital appreciation by investing in small and mid capitalization high yield securities. The portfolio may consist of all types of equity and debt obligations of issuers in Canada and the United States that may or may not be listed for trading upon the facilities of stock exchanges or other organized and regulated trading facilities. Assets of the Fund may also be invested in debt obligations or held in cash to the extent that economic, market, or other conditions make it appropriate.

No material change in the investment objectives of the Fund may be made without the approval of a majority of the votes cast at a meeting of the Fund duly called for that purpose.

Investment Strategies

The Fund uses a value approach to high yield investments as a primary method to securities selection. This means searching for organizations that are able to maintain and grow their distributions. In addition we will look for organizations offering superior long-term earnings and cash flow per share growth, organizations exhibiting a strong position in the markets in which they operate, quality management, and balance sheet strength. This analysis is supplemented by quantitative techniques, which examine movements in general market trends, as well as trends in earnings and the price of securities.

Pending the selection and purchase of suitable investments and the payment of expenses or other anticipated distributions, a portion of the assets of the Fund may be held in cash. In addition, during periods in which the portfolio manager believes that market conditions make it advisable, the portfolio manager may reduce the Fund's

holdings of investments and hold a portion of the Fund's assets in cash. Such cash balances will be held on deposit in cash accounts at any Canadian bank or trust company or may be invested in short term investment funds or guaranteed investment certificates.

The Fund invests in a combination of securities including, but not limited to, common and preferred shares, government and corporate bonds, short term debt instruments, convertible securities (including convertible bonds and warrants), and income trust units and similar entities. These securities are primarily Canadian, but may also, as market opportunities dictate, include American securities as well. The proportions of the different securities in the Fund's portfolio will vary from time to time based upon the portfolio manager's assessment of market conditions; however, the portfolio manager will endeavour to maintain a cash and fixed income weighting of greater than 10% at all times.

The Fund may engage in a limited amount of short selling as well as in securities lending, repurchase, and reverse repurchase transactions. The Fund may also invest in derivatives (including forward contracts, calls and puts) and in Horizons ETFs. These transactions will be used with the Fund's other investment strategies in a manner considered most appropriate to achieving the Fund's overall investment objectives and enhancing the Fund's returns. Please see ***What Does the Fund Invest In?*** on page 46 for more information.

The Fund may depart from its investment objectives and/or investment strategies by temporarily investing all or a portion of its assets in cash or fixed income securities issued or guaranteed by a Canadian or U.S. government, government agency, or company to try to protect it during a market downturn or for other reasons.

WHAT DOES THE FUND INVEST IN?

Investment Objectives

The Fund is designed to achieve long-term capital appreciation by investing in securities of small and mid capitalization equities. Its portfolio may consist of all types of equity and debt obligations of issuers in Canada and the United States that may or may not be listed for trading upon the facilities of stock exchanges or other organized and regulated trading facilities in Canada and the United States. Assets of the Fund may also be invested in debt obligations or held in cash to the extent that economic, market or other conditions make it appropriate.

No material change in the investment objectives of the Fund may be made without the approval of a majority of the votes cast at a meeting of the Fund duly called for that purpose.

Investment Strategies

The Fund invests in a combination of securities including but not limited to government and corporate bonds, short term debt instruments, convertible securities (including convertible bonds and warrants), income trust units, and rights, as well as common and preferred shares. These securities are primarily Canadian, but may also, as market opportunities dictate, include U.S. securities as well. The proportions of the different securities in the Fund's portfolio will vary from time to time based upon the portfolio manager's assessment of market conditions.

The Fund uses a value approach to investments as a primary method to securities selection. This means searching for superior long-term earnings and/or cash flow per share growth companies exhibiting a strong position in the markets in which they operate, quality management, and balance sheet strength. This analysis is supplemented by quantitative techniques that examine movements in general market trends as well as trends in earnings and the price of securities.

Pending the selection and purchase of suitable investments and the payment of expenses or other anticipated distributions, a portion of the assets of the Fund may be held in cash. In addition, during periods in which the portfolio manager believes that market conditions make it advisable, the portfolio manager may reduce the Fund's holdings of investments and hold a portion of the Fund's assets in cash. Such cash balances will be held on deposit in cash accounts at any Canadian bank or trust company or may be invested in short term investment funds or guaranteed investment certificates.

The Fund may engage in a limited amount of short selling as well as in securities lending, repurchase, and reverse repurchase transactions. The Fund may also invest in derivatives (including forward contracts, calls, and puts) and in Horizons ETFs. These transactions will be used with the Fund’s other investment strategies in a manner considered most appropriate to achieving the Fund’s overall investment objectives and enhancing the Fund’s returns. Please see ***What Does the Fund Invest In?*** on page 46 for more information.

The Fund may depart from its investment objectives and/or investment strategies by temporarily investing all or a portion of its assets in cash or fixed income securities issued or guaranteed by a Canadian or U.S. government, government agency, or company to try to protect it during a market downturn or for other reasons.

WHAT ARE THE RISKS OF INVESTING IN THE FUND?

Investment in the Fund is subject to all risks set forth under ***What are the Risks of Investing in a Mutual Fund?*** except for “Borrowing Risk” and “Additional Risks Associated with Investing in ETF Series”.

Significant Investor Risk

As at April 30, 2021, one investor held approximately 13% of the units of the Fund. If this investor redeems a large amount of its units of the Fund, the Fund may be required to fund the redemption by selling securities at an inopportune time. This unexpected sale may have a negative impact on the performance of your investment.

INVESTMENT RISK CLASSIFICATION

The risk level of the Fund is **medium to high**. Please see ***Investment Risk Classification Method*** on page 47 for more information.

WHO SHOULD INVEST IN THIS FUND?

Based on the above investment risk classification, the Fund may be suitable for only medium to high risk investors seeking long-term growth who can tolerate volatility. Like most investments, past performance is not guaranteed and therefore, an investor must be willing to risk a loss.

DISTRIBUTION POLICY

Dividends for the Fund, if any, are paid once a year or at such frequency as the Board of Directors may determine, in its discretion.

FUND EXPENSES INDIRECTLY BORNE BY INVESTORS

Series Z Code	NRP 607

WHAT DOES THE FUND INVEST IN?

Investment Objectives

The Fund's objective is to provide investors with a stable monthly stream of cash distributions and to achieve long term capital growth and current income by investing primarily in equity securities.

The portfolio may consist of all types of equity and debt obligations of issuers, primarily in the United States. The Fund will invest primarily in a diversified portfolio of dividend-paying U.S. equity securities and may invest in corporate debt including, but not limited to, high-yield bonds. The portfolio may include all sizes of issuers including large, mid, and small capitalization companies.

Assets of the Fund may also be held in cash to the extent that economic, market, or other conditions make it appropriate.

No material change in the investment objectives of the Fund may be made without the approval of a majority of the votes cast at a meeting of the Fund duly called for that purpose.

Investment Strategies

The Fund invests in a diversified portfolio consisting primarily of equity securities. The Fund invests in a combination of securities including, but not limited to, common and preferred shares, REITS, government and corporate bonds, short term debt instruments, convertible securities (including convertible bonds and warrants), and other similar entities. The Fund's asset mix will vary according to the portfolio manager's view of market and economic conditions.

Within the equity portion of the portfolio the Fund invests primarily in dividend-paying U.S. equity securities, but may also invest in non-dividend paying U.S. equity securities and non-U.S. equity securities. The Fund may invest in fixed income securities of any quality or term, including government bonds, corporate bonds and treasury bills. All or substantially all of the net assets of the Fund may therefore be invested in foreign securities.

The Fund may invest in equity and debt securities of any size company and may invest a substantial portion of its assets in companies falling within the small cap (generally companies with a market capitalization of less than US\$2.5

billion) and mid cap (generally companies with a market capitalization range of US\$2.5 billion to US\$10 billion) ranges.

Security selection within the portfolio follows a bottom-up approach, which emphasizes careful company specific analysis. This involves evaluating the financial condition, management and prospects of each company, its industry, and the overall economy. The portfolio manager typically emphasizes a value investment approach to select stocks. Valuation measures such as price-to-earnings and price-to-cash flow will be considered relative to a firm's growth prospects. The portfolio manager will focus on quality companies with stable, growing businesses and strong balance sheets and will select companies that offer the potential for future growth in earnings and/or cash flow. Fundamental analysis is supplemented by quantitative techniques, which identify potentially attractive securities based on a combination of attributes in areas such as valuation, growth, profitability, momentum, and risk. The portfolio manager monitors and reviews investments on an ongoing basis with the aim of ensuring that the best relative values are identified.

The Fund may use derivatives such as options, futures, forward contracts, and swaps with the aim of:

- Hedging against losses from changes in the prices of investments, currencies, commodity prices, interest rates, or market indices
- Gaining exposure to individual securities and financial markets instead of buying the securities directly
- Seeking additional income using derivative strategies

The Fund may use derivatives for hedging purposes with the aim of protecting against losses or reducing volatility resulting from changes in the value of the U.S. dollar relative to the Canadian dollar. The portfolio manager will determine the level of currency exposure based on its current view of currency markets. Investments in derivatives will be used in conjunction with the Fund's other investment strategies in a manner considered most appropriate to achieving the Fund's overall investment objectives and enhancing the Fund's returns.

The Fund may hold a substantial portion of its assets in cash or short term money market securities while seeking investment opportunities or for defensive purposes depending on general market or economic conditions.

The Fund may engage in a limited amount of short selling as well as in securities lending, repurchase, and reverse repurchase transactions. The Fund may also invest in Horizons ETFs. These transactions will be used with the Fund's other investment strategies in a manner considered most appropriate to achieving the Fund's overall investment objectives and enhancing the Fund's returns. Please see ***What Does the Fund Invest In?*** on page 46 for more information.

The Fund's portfolio turnover rate may exceed 70%. This may increase portfolio trading costs and taxable distributions and may therefore affect returns. Please see ***Turnover Rate*** on page 40 for a discussion of the tax consequences to securityholders.

The Fund may depart from its investment objectives and/or investment strategies by temporarily investing all or a portion of its assets in cash or fixed income securities issued or guaranteed by a Canadian or U.S. government, government agency, or company to try to protect it during a market downturn or for other reasons.

WHAT ARE THE RISKS OF INVESTING IN THE FUND?

Investment in the Fund is subject to all risks set forth under ***What are the Risks of Investing in a Mutual Fund?*** except for "Borrowing Risk" and "Additional Risks Associated with Investing in ETF Series".

INVESTMENT RISK CLASSIFICATION

The risk level of the Fund is **medium**. Please see *Investment Risk Classification Method* on page 47 for more information.

As the Fund changed its investment objectives effective as of January 31, 2013, and does not have at least ten years of performance history in respect of its current investment objectives, the following reference index has been used to impute the return history for the remainder of the ten year period for which performance history is unavailable: S&P 1500 Total Return Index (USD).

The S&P 1500 Total Return Index (USD) measures large and mid cap performance within the U.S. equity market.

WHO SHOULD INVEST IN THIS FUND?

The Fund may be suitable for you if:

- You want exposure primarily to equity securities;
- You want exposure to U.S. companies that offer dividends;
- You are seeking a regular source of income and the potential for capital appreciation;
- You can tolerate medium investment risk; or
- You're investing for the medium to long term.

Like most investments, past performance is not guaranteed and therefore, an investor must be willing to risk a loss.

DISTRIBUTION POLICY

Dividends for the Fund, if any, are paid once a year or at such frequency as the Board of Directors may determine, in its discretion.

FUND EXPENSES INDIRECTLY BORNE BY INVESTORS

Series Z Code	NRP 3507
Series M Code	NRP 3511

WHAT DOES THE FUND INVEST IN?

Investment Objectives

The Fund is designed to achieve long-term capital appreciation by investing primarily in equity securities of large capitalization issuers. The portfolio may consist of all types of equity and debt obligations of issuers in Canada that are listed for trading upon the facilities of stock exchanges or other organized and regulated trading facilities in Canada. Assets of the Fund may also be invested in debt obligations or held in cash to the extent that economic, market or other conditions make it appropriate.

No material change in the investment objectives of the Fund may be made without the approval of a majority of the votes cast at a meeting of the Fund duly called for that purpose.

Investment Strategies

The Fund invests in a combination of securities including but not limited to common and preferred shares, government and corporate bonds, short term debt instruments, convertible securities (including convertible bonds and warrants), income trust units, and rights.

The proportions of the different securities in the Fund's portfolio will vary from time to time based upon the portfolio manager's assessment of market conditions. The Fund invests in companies with characteristics that are believed to be changing for the better and whose underlying fundamentals appear to be improving more rapidly than the overall stock market. The Fund is usually more willing to give up some of the initial price movement in a stock with the aim of obtaining confirmation that the company's underlying fundamentals are actually improving. Since quarterly financial reports are often a catalyst, the Fund will tend to engage in active and frequent trading of securities to help achieve its investment objectives. As a result, the Fund's portfolio turnover rate may exceed 70%. This may increase portfolio trading costs and taxable distributions and may therefore affect returns. Please see **Turnover Rate** on page 40 for a discussion of the tax consequences to securityholders.

A quantitative model assists in the search for stocks exhibiting strong earnings and price momentum (earnings surprises, estimate revisions, relative strength, etc.) without sacrificing quality of the portfolio as a whole (low trailing and forward price to earnings and price to cash flow ratios, high return on equity, low earnings variability,

low debt/equity, high yield, low Beta, etc.). A list of companies that meet our stringent criteria is created which is then used to populate a portfolio of 30 – 40 names.

The Fund is continually monitored with the objective of quickly identifying companies with deteriorating fundamentals so they can be sold before their relative performance declines significantly. Pending the selection and purchase of suitable investments and the payment of expenses or other anticipated distributions, a portion of the assets of the Fund may be held in cash. In addition, during periods in which the portfolio manager believes that market conditions make it advisable, the portfolio manager may reduce the Fund's holdings of investments and hold a portion of the Fund's assets in cash. Such cash balances will be held on deposit in cash accounts at a Canadian bank or trust company or may be invested in short term investments such as T-Bills, money market funds and guaranteed investment certificates.

The Fund may engage in a limited amount of short selling as well as in securities lending, repurchase, and reverse repurchase transactions. The Fund may also invest in derivatives (including forward contracts, calls, and puts) and in Horizons ETFs. These transactions will be used with the Fund's other investment strategies in a manner considered most appropriate to achieving the Fund's overall investment objectives and enhancing the Fund's returns.

The Fund may depart from its investment objectives and/or investment strategies by temporarily investing all or a portion of its assets in cash or fixed income securities issued or guaranteed by a Canadian or U.S. government, government agency, or company to try to protect it during a market downturn or for other reasons.

WHAT ARE THE RISKS OF INVESTING IN THE FUND?

Investment in the Fund is subject to all risks set forth under *What are the Risks of Investing in a Mutual Fund?* except for "Borrowing Risk" and "Additional Risks Associated with Investing in ETF Series".

Significant Investor Risk

As at April 30, 2021, two investors held approximately 18% and 13%, respectively of the shares of the Fund. If one or both of these investors redeem a large amount of their shares of the Fund, the Fund may be required to fund the redemption by selling securities at an inopportune time. This unexpected sale may have a negative impact on the performance of your investment.

INVESTMENT RISK CLASSIFICATION

The risk level of the Fund is **low to medium**. Please see *Investment Risk Classification Method* on page 47 for more information.

Since the Fund does not have at least ten years of performance history, the following reference index has been used to impute the return history for the remainder of the ten year period for which performance history is unavailable: S&P/TSX Composite Low Volatility Total Return Index. This index measures the performance of the least volatile constituents of the S&P/TSX Composite Index.

WHO SHOULD INVEST IN THIS FUND?

Based on the investment risk classification described above, the Fund may be suitable for low to medium risk investors seeking the potential for long-term growth who can tolerate volatility. Like most investments, past performance is not guaranteed and, therefore, an investor must be willing to risk a loss.

DISTRIBUTION POLICY

Taxable dividends for the Fund may be paid once a year, or at such frequency as the Board of Directors may determine, in its discretion. Capital gains dividends, if any, are paid once a year, or at such frequency as the Board of Directors may determine, in its discretion.

If, in any taxation year, after ordinary distributions, NCM Core Portfolios would otherwise be liable for income tax on net realized capital gains or refundable tax in respect of dividends received from a taxable Canadian corporation, NCM Core Portfolios intends to pay, by the last day of that year, a special capital gains dividend and/or an ordinary dividend in order to ensure that NCM Core Portfolios will not be liable for income tax on such amounts under the Tax Act (after taking into account all available deductions, credits and refunds) or to recover refundable tax not otherwise recoverable upon payment of regular cash dividends. Such special distributions will be automatically reinvested in additional shares and will increase the aggregate adjusted cost base of an investor's shares of that series. Immediately following such reinvestment, the number of shares outstanding will be automatically consolidated such that the number of shares of a series of a Class Fund outstanding after such distribution will be equal to the number of shares of that series of the Class Fund outstanding immediately prior to such distribution, except in the case of a non-resident investor to the extent tax is required to be withheld in respect of the distribution.

WHAT DOES THE FUND INVEST IN?

Investment Objectives

The Fund will seek to achieve long-term capital appreciation by investing primarily in global equity securities. The portfolio may consist of all types of equity and debt obligations of issuers that may or may not be listed for trading upon the facilities of stock exchanges or other organized and regulated trading facilities. Assets of the Fund may also be invested in debt obligations or held in cash to the extent that economic, market, or other conditions make it appropriate.

No material change in the investment objectives of the Fund may be made without the approval of a majority of the votes cast at a meeting of the Fund duly called for that purpose.

Investment Strategies

The Fund uses a Growth At a Reasonable Price approach to investments as a primary method to securities selection. This involves searching for companies exhibiting superior long-term earnings and cash flow per share growth and holding a strong position in the market in which they operate, quality management, and balance sheet strength. This analysis is supplemented by quantitative techniques that examine movements in general market trends as well as trends in earnings and the price of securities.

Pending the selection and purchase of suitable investments and the payment of expenses or other anticipated distributions, a portion of the assets of the Fund may be held in cash. In addition, during periods in which the portfolio manager believes that market conditions make it advisable, the portfolio manager may reduce the Fund's holdings of investments and hold a portion of the Fund's assets in cash. Such cash balances will be held on deposit in cash accounts at any Canadian bank or trust company or may be invested in short term investments such as T-Bills, money market funds and guaranteed investment certificates.

The Fund invests in a combination of securities including, but not limited to, common and preferred shares, government and corporate bonds, short term debt instruments, convertible securities (including convertible bonds

and warrants), and income trust units. These securities are primarily global, but may also, as market opportunities dictate, include Canadian securities as well. The proportions of the different securities in the Fund's portfolio will vary from time to time based upon the portfolio manager's assessment of market conditions.

The Fund may engage in a limited amount of short selling as well as in securities lending, repurchase, and reverse repurchase transactions. The Fund may also invest in derivatives (including forward contracts, calls, and puts) and in Horizons ETFs. These transactions will be used with the Fund's other investment strategies in a manner considered most appropriate to achieving the Fund's overall investment objectives and enhancing the Fund's returns.

The Fund may depart from its investment objectives and/or investment strategies by temporarily investing all or a portion of its assets in cash or fixed income securities issued or guaranteed by a Canadian or U.S. government, government agency, or company to try to protect it during a market downturn or for other reasons.

WHAT ARE THE RISKS OF INVESTING IN THE FUND?

Investment in the Fund is subject to all risks set forth under *What are the Risks of Investing in a Mutual Fund?* except for "Borrowing Risk". Only ETF Series securities are subject to the risks described under "Additional Risks Associated with Investing in ETF Series Securities".

INVESTMENT RISK CLASSIFICATION

The risk level of the Fund is **low to medium**. Please see *Investment Risk Classification Method* on page 47 for more information.

Since the Fund does not have at least ten years of performance history, the following reference index has been used to impute the return history for the remainder of the ten year period for which performance history is unavailable: MSCI World Minimum Volatility Optimized In EUR Net Total Return Local Index. This index measures the performance of a risk-optimized portfolio investing across 23 developed markets countries.

WHO SHOULD INVEST IN THIS FUND?

Based on the investment risk classification described above, the Fund is suitable for low to medium risk investors seeking the potential for long-term growth who can tolerate volatility. Like most investments, past performance is not guaranteed and, therefore, an investor must be willing to risk a loss.

DISTRIBUTION POLICY

Taxable dividends for the Fund may be paid once a year, or at such frequency as the Board of Directors may determine, in its discretion. Capital gains dividends, if any, are paid once a year, or at such frequency as the Board of Directors may determine, in its discretion.
